THE ROYAL MILITARY COLLEGE

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course.

Whilst the College is organized on a strictly military basis, the cadets receive in addition to their military studies a thoroughly practical, scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete, and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The object of the College course is thus to give the cadets a training which shall thoroughly equip them for either a military or civil career.

The strict discipline maintained at the College is one of the most valuable features of the system. As a result of it young men acquire habits of obedience and self-control, and consequently of self-reliance and command, as well as experience in controlling and handling their fellows.

In addition the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures good health and fine physical condition.

An experienced medical officer is in attendance at the College daily.

Five commissions in the Imperial regular army are annually awarded as prizes to the cadets.

The length of course is three years, in three terms of $9\frac{1}{2}$ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras, is from $750 to $800.

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside, in May of each year.

For full particulars of this examination, or for any other information, application should be made as soon as possible to the Adjutant General of Militia, Ottawa, Ont.

ONTARIO'S

. MINING LANDS.

Extensive Gold Fields, Abundant Supplies of Iron, Large Deposits of Copper, Nickel, Silver, Mica, Graphite, Corundum, etc., etc.

The Province of Ontario contains much mineral wealth, comprising the precious and useful metals and many important non-metallic minerals. In fact, almost every variety of valuable or useful material found in the earth's crust is known to occur in Ontario in greater or less abundance.

The gold fields of the northwestern part of the Province, the iron ores of Michipicoton and the Thunder Bay and Rainy River Districts, the nickel-copper ores of the Sudbury region, and the corundum, gold, arsenic and mica of the Eastern counties, though only in the early stages of development, show how great and widely-spread are these natural resources.

The rock formations in which the known deposits of gold, silver, copper, nickel, iron, corundum, etc., occur, extend over large areas, much of which has been very little explored. Along the greatest axis of the mineral-bearing belt—from the St. Lawrence River to the boundary of Manitoba, a distance of about 1,200 miles—runs the Canadian Pacific Railway, and the numberless lakes and water-routes which extend in all directions enable the prospector to take his canoe in any direction.

Crown Lands are sold at $2.00 up to $3.50 per acre, or leased at $1.00 per acre for the first year, and 15 to 30 cents for subsequent years. All royalties on ores and minerals are abandoned.

Explanation of the Articles in the Calendar.

Standard times* are given in all columns headed Toronto, Quebec, and Winnipeg.

The times* of the SUN'S RISING AND SETTING† are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian twice on October 13th.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of the preceding upper transit.

The column, TRANSIT OF FIRST POINT OF ARIES, shows for every day the meantime* at which the FIRST POINT OF ARIES passes the meridian of longitude 4h. 46m. W. (71° 30′), and for any other meridian a correction of 0.655 secs. per degree will have to be applied minus for longitudes west of the 71° 30′, and plus for east. This column is put in especially to be used in connection with the Tables for Time and Azimuth of Polaris when vertical with certain other stars.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest Azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 42°, with the corresponding 1st corrections, which are additive, for latitudes up to 65°. (See pages 33 and 34.) A column for 2nd corrections for minutes of latitude is inserted under the heading "Azimuth values of changes of 1′ in latitude" on page 34, to be used as follows:

Jan. 1st, 1902.	Thus for latitude—	47° 40′	1st Corr.	= +8′ 46″	2nd Corr. +2.06×40 = +1′ 22″
" " "	" "	52° 53′	"	= +20′ 14″	" +2.73×53 = +2′ 25″
" " "	" "	61° 14′	"	= +52′ 4″	" +4.93×14 = +1′ 9″

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table. These constants are calculated for declination 88° 47′ 18″. The maximum error in the use of this Table will not exceed 3 secs. in the higher latitudes, and proportionately less for the lower latitudes.

MOON'S PHASES.—This Table gives the times (standard 75th meridian)* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

* In the present Almanac the hours are numbered from 0 (midnight) to 23.

† Although these times are calculated for Toronto, Quebec and Winnipeg only the standard times at other places not differing much from them in latitude may be obtained with sufficient accuracy for ordinary purposes by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

Star Table.

From the times of the transit of the *First Point of Aries* may be derived, with the aid of the following table, the approximate times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the transit of the *First Point of Aries* for the given day in the calendar. If the result exceeds 24 hours, *subtract* 23h. 56m. To find the time of *rising* of a star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. The stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Example.—Find the time of culmination, rising and setting of α Aquilæ (Altair) September 28th, 1902.

Eclipses.

In the year 1902 there will be five eclipses, three of the sun and two of the moon:

I.—A partial eclipse of the sun, 1902, April 8th. This eclipse will be partly visible in the Yukon District, but will be very small. Magnitude of greatest eclipse = 0.065 (sun's diameter = 1.0).

AZIMUTH OF "POLARIS" AND LOCAL MEAN TIME.

By F. L. Blake, O.L.S. & D.L.S. (*Astronomical Officer, Observatory, Toronto*).

These Tables give the *Azimuth* of *Polaris* and the *Local Mean Time* (not Standard time) when in the same *Vertical Circle* with certain bright stars to be observed during the evening between sunset and midnight. The *Local Mean Time* is obtained by using the column under the heading of Time in conjunction with the *Transit* of the *First Point* of *Aries* over the meridian of longitude, 4^h 46m or 71° 30′ W., and for any other meridian than this the tabulated *Transit* of *First Point* of *Aries* should receive a correction of 0.655 secs. for each degree of longitude differing from 71° 30′. *Subtractive* when the place of observation is *West* and additive *East*.

One of the simplest methods for obtaining time is to observe the transit of the Sun or stars across the meridian, but this line is not always known with sufficient accuracy, and these tables have been prepared with a view to supply surveyors, explorers and others with a ready means of obtaining a known line any clear night by which the Local Time and azimuth of the Pole star can be at once ascertained. This line is simply one that passes through Polaris, the zenith of the observer and one of the stars of the tables. A method of obtaining this *Vertical Circle* would be as follows: A short time before the *Local Mean Time* of passage of the Time Star (this time should be taken out of the Almanac from the tables before the observation) have the instrument set up, well levelled and the collimation error reduced to zero. Sight on *Polaris*, clamp the azimuth plate and turn the telescope over to the other star and wait till it appears in the field of view. Then turn back again to *Polaris* and bisect accurately by means of the tangent screw, note the time and again turn over to the *Time Star* and take the time of its passage over the wires. This time should agree very closely with that in the tables, and if not your watch is in error. At the same time *Polaris* is at its tabulated *Azimuth*, corresponding to the latitude of the place and corrected for date and time interval.

Either before or after this observation the *Latitude* may be very easily obtained from the Latitude Tables which follow by sighting on *Polaris*, noting the time and reading the altitude circle.

EXPLANATION OF TABLES.

First column contains the *Latitude*.
Second " the Azimuth of *Polaris*.
Third " *a′* corrections for each second of time interval.
Fourth " the *Time* to be applied to the *Transit* of the *First Point* of *Aries* for the day of observation to obtain the true *Local Mean Time*.

The *Transit* of the *First Point* of *Aries* will be found in the calendar tabulated for every day of the year for longitude 4^h 46m (71° 30′).

Below each tabulated star will be found the Dates for observing the stars between sunset and midnight with the corresponding *Azimuth Corrections* to the tabulated azimuths.

The elevation of the Time star is also given to help to identify it.

The corrections in column *a′* are decimals of a second of arc, and are to be multiplied by the time interval in seconds to give the correction.

EXAMPLE.

Suppose that in latitude 52° 30′ and longitude 106° 15′ by account on April 16th, 1902, *Polaris* was observed at watch time 23^h 38m 55s and *α* Virginis (*Spica*) in the same vertical at 23^h 41m 10s, giving a time interval of 135 seconds—required the watch error and *Azimuth* of *Polaris*. Also at 23^h 45m 13s, watch time, *Polaris* was again observed to obtain the correction to the supposed latitude, the observed altitude corrected being 51° 17′.

First of all to find the watch error.

To find *Transit* of *First Point* of *Aries* over 106° 15′ longitude:

Longitude	106° 15′	
Constant longitude	71 30	
Difference	34 45	west (subtractive).

	h.	m.	s.
Correction for 34° 45′ = 34.75 × 0.655	= − 0	0	22.8

*The Altitudes of the Time Stars are for Latitude 42°. † After Sept. 21st the Time column for *Altair* will require a constant of 14 hrs. 35 min. 48.4 secs. subtracted from it and the difference subtracted from the *Transit* of the *First Point of Aries* to get the local Time.

TABLES FOR "LATITUDE" BY AN OBSERVED "ALTITUDE OF POLARIS" AT ANY TIME.

By F. L. Blake, O.L.S. & D.L.S. (*Astronomical Officer, Observatory, Toronto*).

Note the watch time when *Polaris* is observed and correct for watch error.

Reduce the *Observed Altitude* to the *True Altitude* by correcting for index error and refraction.

Next take the *difference* between the *True* watch time and the Almanac time of the *Upper Transit of Polaris* for the given day. (This Almanac time will have to be corrected for any other longitude than 71° 30′ for which it is tabulated by *Adding* 0.655 secs. for every degree *East* and *Subtracting* when the place of observation is *West* of 71° 30′.)

Call this *difference* the *Hour Angle*.

Table I.—With this *Hour Angle* and the *True Altitude* enter Table I. and apply the correction to the *True Altitude* always *additive*.

Table II.—Enter Table II. with the *Hour Angle* and apply the correction with its proper sign.

Table III.—Enter Table III. with the *Date* and *Hour Angle* and apply the correction with the same *sign* as used in Table II.

The result is the *Latitude*.

EXAMPLE.

1902, October 27th at $22^h\ 40^m$ mean time by watch which is 30^s slow in longitude 85° 30′ by account suppose the *True Altitude* of *Polaris* to be observed 50° 10′. Required the Latitude.

The correction for an increase of altitude of one inch in the barometer or for a decrease of one degree in the thermometer, is to be added to the *tabular refraction*, but when the barometer is lower than 30 inches, or the thermometer higher than 47°, the corrections become *subtractive*. When great accuracy is required, 0·003 inch should be deducted from the observed height of the barometer for each degree that the thermometer near it is above 50°, and the same quantity added for an equal decrease.

PERPETUAL CALENDAR.

To ascertain any day of the week for any month for any year, from the year One to the year Two Thousand Five Hundred :—First, set down the year you wish to ascertain, without the prefix of the century; then add twenty-five per cent. to it, without fractions; then add the day of the month. Also add the figures given below for the month of the year. Then add all together and divide the product by 7; the remainder will be the day of the week required. For Sunday, 1; Monday, 2; Tuesday, 3; Wednesday, 4; Thursday, 5; Friday, 6; Saturday, 0.

From the year 100 until 1700, both inclusive, are Leap Years. When Leap Years occur, for the months of January and February only use the figures for the century you wish to ascertain.

TIDE TABLES FOR HALIFAX, QUEBEC, AND ST. JOHN, N.B., 1902.

These Tide Tables, with Tidal Differences for other places, are issued by the Tidal Survey Branch of the Department of Marine and Fisheries of the Dominion of Canada. They are based upon direct observations of the tides, obtained by means of self-registering tide-gauges, which are kept in continuous operation day and night throughout the year. The records are reduced by the latest methods of analysis, and the computation of the tables is made in the Nautical Almanac Office, London.

The Tide Tables for Halifax are based upon the analysis of a record which was obtained during the years 1851, 1852, 1860 and 1861, with which there has been incorporated the record for one full year from the present tide-gauge. The Quebec Tables are based upon the record for four complete years. The St. John Tables are based upon the record for two complete years.

The Tidal Differences are based upon simultaneous observations taken throughout the St. Lawrence and the Bay of Funday.

W. Bell Dawson,
Engineer in Charge.

Wm. P. Anderson,
Chief Engineer.

The TIME used is Standard Time for the 60th meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from a plane of reference at *one foot* below the level of Low Water at ordinary Spring Tides, which is the datum of the Admiralty Charts. Hence to obtain the height above the Admiralty Datum deduct 1·0 foot from the height above given.

THE DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 22·4 feet to the height of High Water as above given.

The Time used is Standard Time for the 60th meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The Height is measured from a plane of reference at *one foot* below the level of Low Water at ordinary Spring Tides, which is the datum of the Admiralty Charts. Hence to obtain the height above the Admiralty Datum deduct 1·0 foot from the height above given.

The Dry Dock.—To find the depth of water on the sill of this dock at any tide *add* 22·4 feet to the height of High Water as above given.

The TIME used is Eastern Standard for the 75th meridian, which is five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same datum as used for the Admiralty Chart of Quebec Harbour.

LEVIS DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 7·7 feet to the height of High Water as above given.

The TIME used is Eastern Standard for the 75th meridian, which is five hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at ordinary Spring Tides; that is, from the same datum as used for the Admiralty Chart of Quebec Harbour.

LEVIS DRY DOCK.—To find the depth of water on the sill of this dock at any tide *add* 7·7 feet to the height of High Water as above given.

The TIME used is Standard Time for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The HEIGHT is measured from the level of Low Water at Spring Tides, as ascertained by the tide-gauge observations themselves. (This level is approximately 1·4 feet lower than the datum to which the soundings on the Chart of St. John Harbour are referred, as nearly as this can now be ascertained.)

The Time used is Standard Time for the 60th Meridian, which is four hours slower than Greenwich Mean Time. It is counted from 0 to 24 hours, from midnight to midnight.

The Height is measured from the level of Low Water at Spring Tides as ascertained by the tide-gauge observations themselves. (This level is approximately 1·4 feet lower than the datum to which the soundings on the hart of St. John Harbour are referred, as nearly as this can now be ascertained.)

LEGAL WEIGHTS AND MEASURES IN CANADA.

The legal weights and measures of Canada are the Imperial yard, Imperial pound avoirdupois, Imperial gallon (of 277·27384 cubic inches), and the Imperial bushel. The Imperial gallon is equal to 4·54174 litres, while the wine gallon, used in the United States, is equal to 3·785 litres.

By Act 42nd Vic. (1879), Chap. 16 (amended by Chap. 30, Acts of 1898), it is provided: That in contracts for sale and delivery of any of the undermentioned articles, the bushel should be determined by weighing, unless a bushel measure be specially agreed upon, the weight equivalent to a bushel being as follows:—

Wheat, 60 lbs. Indian Corn, 56 lbs. Rye, 56 lbs. Pease, 60 lbs. Barley, 48 lbs. Malt, 36 lbs. Oats, 34 lbs. Beans, 60 lbs. Flax seed*, 56 lbs. Hemp, 44 lbs, Blue grass seed, 14 lbs. Lime‡, 80 lbs. Castor beens, 40 lbs. Potatoes, 60 lbs. Turnips, 60 lbs. Carrots, 60 lbs. Parsnips, 60 lbs. Beets, 60 lbs. Onions†, 50 lbs. Bituminous coal, 70 lbs. Clover seed, 60 lbs. Timothy, 48 lbs. Buckwheat, 48 lbs.

By the same Act the British hundredweight of 112 pounds and the ton of 2,240 pounds were abolished, and the hundredweight was declared to be 100 pounds, and the ton 2,000 pounds avoirdupois, thus assimilating the weights of Canada and the United States.

*Changed from 50 to 56 lbs. by Act of Parliament, 1898.

BRITISH PREFERENTIAL TARIFF.

On and after the 1st day of August, 1898, section 17 of the said Act shall be repealed, and the following shall be substituted therefor:—

"Articles which are the growth, produce or manufacture of any of the following countries may, when imported direct into Canada from any of such countries, be entered for duty or taken out of warehouse for consumption in Canada at the reduced rate of duty provided in the British preferential tariff set forth in Schedule D to this Act:—(*a*) The United Kingdom; (*b*) The British colony of Bermuda; (*c*) The British colonies, commonly called the British West Indies, including the following: the Bahamas, Jamaica, Turks and Caicos Islands, the Leeward Islands (Antigua, St. Christopher-Nevis, Dominica, Montserrat, and the Virgin Islands, the Windward Islands (Grenada, St. Vincent and St. Lucia), Barbados, Trinidad and Tobago; (*d*) British Guiana; (*e*) Any other British colony or possession the customs tariff of which is, on the whole, as favourable to Canada as the British preferential tariff herein referred to is to such colony or possession.

Provided however, that manufactured articles to be admitted under such preferential tariff shall be *bona fide* the manufactures of a country or countries entitled to the benefits of such tariff, and that such benefits shall not extend to the importation of articles into the production of which there has not entered a substantial portion of the labour of such countries. Any question arising as to any article being entitled to such benefits shall be decided by the Minister of Customs, whose decision shall be final.

"Raw sugar, including all sugar described in item 436 of Schedule A, may, when imported direct from any British colony or possession, be entered for duty or taken out of warehouse for consumption in Canada at the reduced rate of duty provided in the British preferential tariff.

"The Minister of Customs, with the approval of the Governor in Council, shall determine what British colonies or possessions shall be entitled to the benefits of the preferential tariff under clause (*d*) of subsection 1 of this section.

"The Minister of Customs may, with the approval of the Governor in Council, make such regulations as are deemed necessary for carrying out the intention of this section."

METRICAL WEIGHTS AND MEASURES.

The French metrical system is based upon the (assumed) length of the fourth part of a terrestrial meridian. The ten-millionth part of this arc was chosen as the unit of measures of length, and called a *Metre*. The cube of the tenth part of the metre was adopted as the unit of capacity, and denominated a *Litre*. The weight of a litre of distilled water at its greatest density was called a *Kilogramme*, of which the thousandth part, or *Gramme*, was adopted as the unit of weight. The multiples of these, proceeding in decimal progression, are distinguished by the employment of the prefixes *deca*, *hecto*, *kilo* and *myria*, from the Greek, and the subdivisions by *deci*, *centi* and *milli*, from the Latin :—

Reigning King and Emperor of India.—Edward VII.

Executive Power.

A sovereign, exercising all powers of executive government through a cabinet composed of certain sworn privy councillors, who act as advisers of the crown, and conduct the public administration in accordance with law and constitutional usage. The crown is hereditary, but subject to such limitations as may be imposed by parliament—*i.e.*, by the crown, lords and commons. The head of the administration is the premier, or first minister, who is the choice of the crown; he selects the members of the cabinet and ministry, with the approval of the sovereign. The cabinet consists, at present, of sixteen ministers; the first lord of the treasury is generally premier. In addition to the inner or advisory council, called the cabinet, there are other ministers holding subordinate positions in the government, but who also retire with the cabinet in case of resignation or defeat. The whole number of persons comprising the government of England, including the chief officials for Scotland and Ireland, is fifty-six. The government hold office as long as they retain the confidence of the house of commons. The common law is the basis of justice in Great Britain and Ireland, and in all colonies and dependencies of the crown. Wherever, in the latter, the civil or other law is in force, it will be stated below in the case of the particular colony.

Legislative Power and Local Government.

The parliament of Great Britain is composed of the crown, lords and commons. The lords consists at present of 593—archbishops (2), bishops (24) and peers, the latter divided into 22 dukes, 22 marquesses, 142 earls, 34 viscounts, and 341 barons. Six princes of the royal blood have also seats in the house. Scotland is represented by 16 peers, elected for each parliament, and Ireland by 28 representative peers elected for life. The speaker is the lord high chancellor of England, who is a member of the cabinet, and retires with a change of government. The house of lords has co-ordinate powers of legislation with the house of commons, except as respects taxation or money bills. It cannot initiate or amend such bills, but it may under exceptional conditions reject them as a whole. The house of commons is the body where the chief political power rests. It consists of 670 members, elected by the legal electors of Great Britain and Ireland, as follows: England 465, Wales 30, Scotland 72, Ireland 103. All elections are now by ballot. Since the reform bill of 1832 the franchise has been widely extended to all classes who have a stake in the country. The suffrage is now divided among freeholders, copyholders, leaseholders, occupants of lands and tenements, and lodgers of a specified value. The house of commons lasts for seven years, unless sooner dissolved by the crown with the advice of the cabinet. Parliament is summoned, prorogued and dissolved by the sovereign. The speaker and deputy speaker of the commons are elected by the house for the duration of the parliament. Members do not require a property qualification, but they must be English citizens of the age of 21 years, not bankrupts, or idiots or criminals. Members are not paid. The system of local government has been much simplified quite recently. England and Wales are now divided into 62 administrative counties, including the city of London. In every county there is a council composed of aldermen and councillors. Aldermen are elected for six years, half of them retiring every third year. A councillor is elected for three years. The counties are again divided into "urban districts" and "rural districts," in which councils are elected. The parish continues to be a unit of local goverment, and the duties formerly performed by "vestries" are now discharged by "parish meetings" and "parish councils." In cities and towns the affairs are administered by municipal corporations, consisting of mayor, aldermen and burgesses; the mayor and aldermen are elected by the council, and the burgesses by ratepayers. Women can be elected only to district councils and parish councils, including the London vestries. Married as well as single women can vote at parochial elections. In Scotland there are parish councils, and municipal bodies in towns and cities. The councils of the latter consist of a provost and bailies. In Ireland in some towns and boroughs there are corporations consisting of mayor, aldermen and councillors. In the majority of towns local government is entrusted to commissioners, appointed by the Irish government.

BRITISH COLONIES AND DEPENDENCIES, viz.:

Aden, a British protectorate and fortified station; estimated population, 42,000, mostly Bedouins; area, 75 square miles.

Perim, a dependency of Aden, has five square miles, and a population of 2,000.

Executive Power.—Under the lieutenant-governor and council of Bombay, who are represented by a president or political resident, who is the commandant of the English troops in the peninsula.

Andaman and Nicobar Islands, a penal settlement; estimated population, 27,000; area, 2,635 square miles.

Executive Power.—Subject to government of Bengal (see India). A chief commissioner and superintendent are appointed by the Indian government.

Ascension Island, a naval station; area, 35 square miles; population, about 500.

Executive Power.—This rocky island is under the control of the English navy.

Australia, Commonwealth of, a federal dependency with representative and responsible government; population (1899), 3,756,894; area, 2,972,573: see statistics given below for New South Wales (p. 105), Tasmania (p. 106), South Australia (p. 105), Western Australia (p. 106), Queensland (p. 105), and Victoria (p. 106), which form the new federation proclaimed in 1901, under the Imperial Act passed in 1900, in accordance with the vote of the people of these several dependencies.

Executive Power.—The King represented by a Governor-General, appointed by the Crown, and advised by an executive council, consisting at first of seven members. The government holds office as long as it has the confidence of the people, as expressed by their representatives in parliament. The principles of English parliamentary government prevail in the commonwealth and states of the federation. The common and criminal law of England obtains in all the states. The judicature consists of a federal High Court, and such other federal courts as the parliament of the commonwealth may establish. The justices of these courts are appointed by the

*Revised and corrected from latest available authorities.

Governor-General-in-Council, and hold office during good behaviour. The High Court is a court of appeal from the courts of the states. Appeals may be made from its decisions to the Privy Council of England under limitations. The state courts remain under the sole jurisdiction of the state governments, and appeal can be made direct to the King-in-Council, as heretofore, under certain restrictions.

LEGISLATIVE POWER.—The King, Senate and House of Representatives. The Senators are elected by the people of the states for six years. Each state has an equal representation of six members, and half the number of senators shall retire every three years, but are re-eligible for re-election. The franchise for the election of a senator is the same as that for the popular body at the time of the union. The president is elected by the senate. The place of a senator becomes vacant if he is absent for two consecutive months of a session. The House of Representatives consists, as near as possible, of twice the number of Senators, but no state shall have a smaller representation than five members. Members are elected for three years. The Speaker is elected by the house. Members of each house receive £400 each as a sessional indemnity. Bills appropriating revenue or moneys, or imposing taxation shall only originate in the house of representatives. As in Canada and England by practice, the senate may not amend bills imposing taxation or appropriating revenue or moneys for ordinary annual services of the government. But the senate may at any stage return to the lower house a bill requesting the amendment of any items or provisions therein, and the house may accept or reject such proposals. In case of a deadlock a dissolution takes place, and afterwards a joint sitting at which a majority of votes decide the fate of the disputed measure. The federal parliament has power to alter the franchise on which its members are elected, but it cannot diminish the voting powers of the people, or withdraw the right of women to vote as long as adult suffrage obtains in any states. The legislative powers of the federal parliament are alone enumerated, and all other powers rest with the state parliaments. In the event of a federal law conflicting with an existing state law, the federal law shall prevail. The federal government has the administration of the departments of customs and excise, which form the chief sources of federal revenue, but of the net revenue from such duties not more than one-fourth shall be applied annually by the commonwealth towards its expenditure, and the balance shall be paid to the several states or applied towards the payment of interest on debts of the several states taken over by the federal government. Uniform duties of customs must be imposed within two years after the establishment of the commonwealth. The king may disallow any federal law within one year from the governor-general's assent. The capital of the commonwealth will be within New South Wales, but at least 100 miles from Sydney, and must be in federal territory. As the constitutions of the states of the commonwealth remain unchanged until amended by their respective parliaments, I may simply refer the reader for the present to New South Wales, Tasmania, South Australia, Queensland, Western Australia and Victoria as given below.

Though it cannot initiate or amend such bills, it may reject them under extraordinary circumstances. Members are paid $1,000 for a session of over 30 days, and a sum for travelling expenses at the rate of 10 cents a mile going and returning. The house of commons consists of 213 members, elected from 1885 until 1898 on a dominion franchise, which was, in the latter year, repealed. As Canada possesses a system of federal government, her legislative powers are limited to certain subjects of dominion or national import, set forth in the written constitution, or British North America Act, of 1867, with the residue of power not expressly given to the provinces in the federal government. All the provinces of Canada, except Prince Edward Island, possess a very complete system of municipal government, which entrusts certain *quasi* legislative powers to councils in municipal divisions known as cities, counties, townships, towns, villages and parishes, and elected by ratepayers. The rules and usages of procedure of the Canadian parliament and of the legislatures are based on those of the imperial parliament. The closure does not exist in Canada.

EGYPT, under the nominal suzerainty of the sultan; population, about 10,000,000; area, 400,000 square miles.

Executive Power.—A hereditary khedive (Abbas Hilmi), aided by a council of six ministers. He has also the benefit of the advice of an English financial adviser appointed by himself, and whose consent is necessary to every decision on financial matters. He can sit on the council though not a member of the executive. English influence prevails in administration.

Legislative Power and Local Government.—The khedive has promulgated a constitution intended to give the people a share in legislation, but so far it is practically nugatory. Egypt is divided into governorships of towns and provinces with extensive powers, but all under the control of the khedive and executive.

United States of America, federal republic; population in 1900, 76,356,102, including Alaska; area, 3,507,640 square miles.

EXECUTIVE POWER.—President, elected for four years under the constitution by electoral colleges in each state equal to the whole number of its senators and representatives in congress; but practically the election is by the direct vote of the people. Each political party nominates a set of electors on a presidential ticket and the people vote directly for them. Under the constitution the electors meet in each state on a particular day and invariably cast their votes in accordance with the result of the election. There is also a vice-president elected by the same political method. The president is head of the executive, and has a veto over the legislation of congress, but it can be over-ridden by a two-thirds majority in each house. He is aided by a cabinet of eight secretaries of state and heads of departments, appointed by himself with the approval of the senate, but having no seats in or responsibility to congress. In case of death, resignation or disability of the president, the vice-president succeeds. [On the assassination of President McKinley, Vice-President Roosevelt succeeded on 14th September, 1901, and holds office until March 4, 1905.] If there is no vice-president the secretary of state or other members of cabinet succeed in order of seniority until a new president is appointed or the disability is removed. Elections for president and vice-president take place on the Tuesday following the first Monday in November every fourth (leap) year, and they take office on the 4th March following.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—Congress of two houses; a senate of 90 members, or two from each state, chosen by the legislatures for six years; a house of 357 representatives elected every second year by the electors of the states in accordance with their respective election laws; universal suffrage limited in a few cases by residence, educational tests, registration and payment of taxes. Senators must be 30 years of age, citizens for nine years, and residents of the states which elect them. Representatives must be about 25 years of age, citizens for seven years, and residents of the states in which they are elected. The senate has the power of approving or rejecting the higher appointments and treaties made by the president, and of acting as a court of impeachment for the president, judges of the supreme court, and other high functionaries. It can also amend bills for raising revenue, which alone can originate in the house of representatives. The vice-president is *ex officio* president of the senate, which may also appoint a temporary president. The speaker of the house is elected by its members. Members of both houses receive $5,000 and travelling expenses every year. The territories are represented by one elected delegate in each case, who cannot vote in the house. The legislative powers of the congress are enumerated in the constitution. The supreme court of the United States can hear and determine issues of laws as to the interpretation of the constitution and may declare the acts of congress unconstitutional or *intra vires*, as the case may be. The federal judges are appointed by the president with the approval of the senate. A permanent civil service is being gradually built up, and removals from office in the case of officials, not political in their nature, are very much less frequent of late years with the extension of civil service rules to all departments.

Executive Power.—In each state there is a governor and a lieutenant-governor and officers to administer the government. The governor and lieutenant-governor are elected by the people for four years in following states: California, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, Nevada, North Carolina, Oregon, Pennsylvania, Virginia, Washington, West Virginia, and Wyoming. In the following states the term is three years: New Jersey and New York. In the following, two years: Alabama, Arkansas, Colorado, Idaho, Iowa, Kansas, Michigan, Minnesota, Nebraska, New Hampshire, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, Vermont, Wisconsin. In the following, the term is one year: Connecticut, Maine, Massachusetts and Rhode Island. All the governors have the power of veto over legislation except in Delaware, North Carolina, Ohio, Rhode Island. It requires a majority or two-thirds vote to over-ride the veto. The governor is the head of the executive and has no responsible ministers in the English or Canadian sense, but the executive or administrative officers are generally elected.

Legislative Power and Local Government.—In all the forty-five states there is a legislature of two houses; an upper house, generally called senate, and a house of representatives, both elected by the people of the state. In the following states the senate is elected for four years, the house of representatives for two years, and sessions are biennial, with the exception of the states mentioned: Alabama, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Mississippi (annual), Missouri, Montana, Nevada, North Dakota, Oregon, Pennsylvania, South Carolina (annual), Texas, Utah, Virginia, Washington, West Virginia and Wyoming. In the following states the term is for the senate two, for the house, two, and sessions biennial: Idaho, Michigan, Nebraska, New Hampshire, North Carolina, Ohio, South Dakota, Tennessee, Vermont. In the following states the term is one for both senate and house, and sessions annual: Connecticut, Maine, Massachusetts, Rhode Island. In Minnesota the term of the senate is two years, of the house one, and sessions annual. In New York the senate two, the house one, and the sessions annual. In New Jersey the senate three, the house one, and the sessions annual. Universal suffrage is the rule, though Delaware has a tax qualification in state senate elections. In some states the payment of a poll tax, illiteracy and residence enter into qualifications. In Colorado, Idaho, Utah and Wyoming women can vote. Members of the legislature are paid. All public officials, state and municipal, are elected as a rule, but the tendency in the older states is to have a permanent public service apart from political heads. In 31 states the judges are elected by the people; in five, by the legislature; in eight, appointed by the governor, subject to confirmation by the legislature or council. The Australian or Canadian ballot is now in force in 40 states; nine have passed stringent laws against corrupt practices at elections, but they are practically effective in only two or three states.

Throughout the union there is a very complete system of township, county, and city government. Township local government prevails in the New England states, the county is generally the unit in the south; in the middle and north-western states there is a mixed system. In several of the western states women can vote and be elected for municipal and school bodies. In all cases councils are elective. In the large cities there have been cases of gross corruption and mismanagement, and the best methods of improving municipal government are now attracting much serious attention.

ARIZONA; pop., 122,212; area, 112,920 sq. m.

HAWAIIAN OR SANDWICH I.; pop., 154,001 (26,000 white); area, 6,640 sq. m.

Executive Power.—In the territories the governors and other officials, including judges, are appointed for four years by the president of the United States. The legislatures (council and house of representatives) of the organized territories of Arizona, Hawaii, New Mexico, Oklahoma, are elected for two years, but their powers of legislation are large, though subject to federal restrictions. In the other territories there are only governors and officials appointed by the president.

United States Dependencies:

CUBA; population, about 1,606,000; area, 35,994 square miles. The United States went to war with Spain for the independence of this island, where internecine strife prevailed for years, to the disgrace of Christendom. Spain was soon driven from her ancient dependency, but its independence has not yet been conceded by the United States. Preparations, however, are now in progress to give the island a permanent, independent form of government as arranged at a Constitutional Convention chosen by the people of the island.

GUAM (Ladrones). Ceded by Spain to the United States in 1898. A coaling station for the U.S. navy.

PHILIPPINE ISLANDS. These islands were ceded by Spain to the United States on December 11, 1898. They are about 2,000 in number. Total area, 115,300 square miles; population, estimated, 8,000,000. No definite form of government has yet been established, but a small number of the natives continue to give a feeble resistance to the arms of the United States. A provisional government is now being formed for the conduct of affairs.

PORTO RICO. Ceded by Spain to the United States on December 11, 1898. Area, 3,600 square miles; population, 798,560. A representative system of government, like that in the Territories, is now organized.

Uruguay, republic; estimated population in 1895, 900,000; area, 72,110 square miles.

EXECUTIVE POWER.—President, elected for four years, and aided by a council of five ministers.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—Congress of two houses; a senate of 19 chosen by an electoral college for six years, one-third retiring every two years; a house of 69 representatives elected every three years by all male adults who can read and write.

Samoan Islands. The island of Tutuila and several small islands of the group are now under the control of the United States (p. 114).

Venezuela, republic; population, about 2,324,000; area, 593,943 sq. miles, but England claimed about 50,000 sq. miles as forming part of British Guiana—a question in dispute for years, and finally settled by the award of the tribunal of arbitration, 3rd October, 1899.

EXECUTIVE POWER.—President, chosen for two years, without veto power, and aided by a responsible ministry of six members, and a federal council of 19 members. Congress appoints the council every two years, and the latter choose the president.

LEGISLATIVE POWER AND LOCAL GOVERNMENT.—Congress of two houses; a senate of 24 members or two elected for each state legislature for four years; a house of 52 representatives, elected by direct vote for four years.

Wadai (Central Sudan), and subject states of Kanem and Bagirmi, estimated population, 2,750,000; area, 302,000 square miles. These semi-civilized states are now within the sphere of French influence, which also extends practically to the whole of the Sahara and Libyan Deserts.

THE KING'S CIVIL LIST.

Consequent upon the death of Her Majesty Queen Victoria, and the accession of His Majesty Edward VII., there was passed in the Parliamentary session of 1901 what is known as the Civil List Act, the Act by which is determined what charges shall be made on the consolidated fund for the maintenance of the King and his family.

Until George III. came to the throne in 1760, the income of the sovereign was derived chiefly from Crown lands, from a variety of landed property in England and Wales, Scotland and Ireland, in which the sovereign had a life-interest, and from which he received the rents. In the feudal ages these lands constituted a princely patrimony. In later times this Crown property was greatly reduced by lavish grants to royal favorites. At the Restoration the income from Crown lands was ascertained by a committee of the House of Commons to amount to £217,900 a year, in addition to £4,000 from the Forest of Dean. By the time Charles II. had been on the throne three years he had by his lavish bestowal

of the lands on favorites reduced the income to £100,000. William III., by his grants to favorites who had accompanied him from Holland, made further havoc with the Crown domains; so much so that at the accession of Queen Anne Parliament endeavored to save the remnant by an Act (1 Anne, c. 8) which prohibited alienation of Crown lands, and enacted stringent provisions in regard to the length of the term for which they might be leased and the rents reserved.

Queen Anne, George I. and George II. derived the larger part of their income from their life-interest in the Crown property, but when George III. came to the throne he surrendered his life-interest in the Crown lands. It was turned over to the nation in return for a fixed Civil List of £800,000, subsequently increased to £900,000. George IV., William IV. and Queen Victoria, on their accessions, surrendered their life-interest in the Crown lands in return for a Civil List. The same course was taken by Edward VII. when he came to the throne; and soon after Parliament assembled a committee of the House of Commons was appointed to recommend the new Civil List. It reported on the 4th of April, 1901, and its recommendations were embodied in an Act (1 Edward VII., c. 4), which was read a third time in the House of Commons on June 18th. By this Act the King's Civil List was fixed at a yearly sum of £470,000, assigned as follows:

CLASSES OF EXPENDITURE.	SUM APPROPRIATED.
I. Their Majesties' Privy Purse	£110,000
II. Salaries of His Majesty's household and retired allowances	125,800
III. Expenses of His Majesty's household	193,000
IV. Works	20,000
V. Royal bounty, alms and special services	13,200
VI. Unappropriated	8,000
Total	£470,000

In the event of Her Majesty Queen Alexandra surviving the King it is enacted that there shall be paid to the Queen during her life an annuity of £70,000.

Another clause provides that there shall be paid to the Duke of Cornwall and York "during the joint lives of his present Majesty and of his said Royal Highness, an annuity of £20,000"; that "there shall be paid to the Duchess of Cornwall and York during the continuance of her marriage with the Duke of Cornwall and York, for her sole and separate use, but without any power of anticipation, an annuity of £10,000; and that in the event of the Duchess surviving the Duke there shall be paid to her during her life an annuity of £30,000."

In respect to His Majesty's daughters, Princess Louise (Duchess of Fife), Princess Victoria and Princess Maud (Princess Charles of Denmark), it is enacted that as a provision for them there shall be an annual allowance of £18,000 during their joint lives, "to be reduced at the death of each of the said princesses by £6,000."

The Civil List of Her late Majesty, Queen Victoria, as fixed by the Act of 1837, was £385,000, assigned as follows:

Her Majesty's Privy Purse	£ 60,000
Salaries of Household	131,260
Expenses of Household	172,500
Royal Bounty, etc.	13,200
Unappropriated	8,040

At the death of the Queen, the allowances to Her Majesty, to the Prince and the Princess of Wales, and in respect to the Prince of Wales's children, aggregated £471,000, The details of these payments were:

Her Majesty's Civil List	£385,000
The Prince of Wales (26 Vict., c. 1)	40,000
The Princess of Wales (26 Vict., c. 1)	10,000
Annuity, Prince of Wales's children (52-3 Vict., c. 35)	36,000

Until the death of the Dowager Empress of Germany, on August 5th, 1901, annuities amounting to £72,000 were payable to other members of the Royal Family. These annuities were not affected by the death of the Queen, but with the death of the Dowager Empress an annuity of £8,000 came to an end.

The annuities to the Royal Family after the resettlement at the accession of Edward VII. stand thus:

His Majesty (Civil List)	£470,000
Duke of Cornwall and York	20,000
Duchess of York	10,000
Princesses Louise, Victoria and Maud	18,000
Princess Christian of Schleswig-Holstein	6,000
Princess Louise, Duchess of Argyle	6,000
Duke of Connaught	25,000
Princess Beatrice (of Battenburg)	6,000
Duchess of Mecklinburg-Strelitz	3,000
Duke of Cambridge	12,000
Duchess of Albany	6,000
Total	£582,000

The revenues of the Duchies of Cornwall and Lancaster are outside the Civil List arrangement. Those of Cornwall are vested in the eldest son of the reigning sovereign, who becomes by birth the Duke of Cornwall, by virtue of a patent of Edward III. in 1337. The Duchy of Lancaster was the private patrimony of Henry Bolingbroke, son of John of Gaunt. It is separate from the other possessions of the Crown in order and government, but united to it in point of inheritance.

THE BRITISH ARMY IN 1901-2.

The British Army in 1901, as in 1900, was on a war-footing. In March, when the army estimates were laid before the House of Commons, there were, in round numbers, still 250,000 men in South Africa, and a small force was still in China in consequence of the uprising of the Boxers in the previous year.

What the South African war was costing Great Britain in 1901 is shown in the army estimates, in which £56,070,000 were put down as the estimated expenditure on the war in the financial year 1901-2. For the year 1900-1 the actual expenditure was £61,286,700. In China, in 1900-1, the military expenditure was £3,450,000, as compared with £2,160,000, the estimated expenditure in 1901-2. In the aggregate Great Britain in 1900-1 expended £64,736,700 on war services, while in 1901-2 the aggregate estimated expenditure—an expenditure provided for by Parliament—was £58,230,000.

In addition to these war charges the cost of the ordinary services in 1900-1 was £24,262,700. In 1901-2 the estimated cost of the ordinary services is £29,685,000, the large increase being due to increases in the strength of the military forces—chiefly in the auxiliary forces—due to the new organization scheme which was sanctioned by Parliament in the session of 1901. In all, the military expenditure for the year 1901-2 is estimated at £87,915,000. The actual expenditure in 1900-1 was £88,999,400. As illustrating the increase of expenditure on the army in the last two decades it may be noted that in 1886, when a Conservative government was in power, the total vote for the regular army, which then numbered 190,000 men, was £16,000,000.

The accompanying table, taken from the army estimates of 1901-2, brings out in detail the strength and cost of the British army in the two years in which, in consequence of the South African war, the army was on a war-footing :—

The new organization scheme, the cost of the carrying out of which has so greatly swelled the ordinary military charges for 1901-2, is based on the fact that the war in South Africa has shown (1) that Great Britain requires a better army organization than that hitherto existing, and must be able to send at least three army corps abroad, besides leaving a properly organized force for home defence; (2) that more artillery and mounted troops are required; (3) that a reformed medical and transport service is necessary; (4) that better trained officers are needed; (5) that there should be less barrack square drill for soldiers, and more musketry and scouting drill, and more individuality on the part of soldiers. It is also based on the fact that Great Britain has to maintain 115,000 men in India and the colonies, and is dependent on voluntary recruits.

In the new plan, intended to meet these needs and these conditions, the Government decided to develop the existing system in preference to establishing a separate Indian army or to adopting compulsion for home defence. In pursuance of this policy the new organization scheme divides Great Britain and Ireland into six army corps districts, namely, Aldershot, Salisbury Plain, Colchester and York: Scotland and Ireland each forming one division. In each of these military divisions there are to be troops of all arms necessary for an army corps. Three of the army corps are to be formed entirely of regular troops; the others are to include 60 battalions of militia and volunteers and 21 militia and volunteer field batteries. All these troops are to be specially trained for the places assigned to them in the army corps.

The scheme involves no large increase in the number of regular or enlisted troops, but a sufficient number of these are to be freed from garrison duty abroad and from duty at coaling-stations to admit, it is expected, of 18 additional battalions being available for service with the army corps.

By increases in pay and other inducements the militia force is to be increased from 100,000 to 150,000 men, and the men are to be much better trained in musketry. The Imperial Yeomanry, which was organized in connection with the old yeomanry troops and largely increased in numbers, is to be further augmented to 35,000 men. If practicable the existing Colonial Yeomanry forces are to be continued and affiliated with the British forces for Imperial service. As regards the Volunteers the new plan includes the raising of twenty-five additional battalions, as well as fifteen batteries of field artillery and forty batteries of heavy field artillery. The men in the Volunteer force are to be specially trained for army corps, and the new volunteer battalions and batteries are specially intended for the defence of positions around London.

The plan is designed to raise 126,500 additional men—most of them for the militia, the volunteers and the yeomanry. If the expectations of the War Office are fully realized, the total British forces will be brought up to an aggregate of 680,000 men. The make-up and the places in army organization assigned to these forces are set out in the table given below :—

Regulars	155,000	Field Army	260,000
Reserve	90,000	Garrisons at home	196,000
Militia	150,000	Volunteers—	
Yeomanry	35,000	London Defences	100,000
Volunteers	250,000	Staffs	4,000
			560,000
		Surplus Sick and Recruits	120,000
	680,000		680,000

Although public interest in the war in South Africa was less manifest in 1901 than in 1900 recruiting continued active. Up to July 27th recruits numbered 25,700, of whom 12,390 were for infantry, the others for special service. Troops were going and returning from South Africa all through the year. Large contingents of fresh troops were sent out as late as the end of August. By this time, however, the homeward stream was larger than the outward one. On May 1st there

were, according to official returns, 249,416 officers and men in South Africa. These troops were made up as follows:

Regulars	138,002
Colonials	58,821
Imperial Yeomanry	23,104
Volunteers	9,385
Militia	20,104

Of the non-commissioned officers and men of the regular army in South Africa on May 1st, 14,000 were cavalry, 15,500 artillery, 95,700 infantry and mounted infantry, and 13,619 of other arms of the service.

The total reduction of the South African Field Force up to the end of August was:—

	Officers.	Men.
Killed in action	399	4,172
Died of wounds	129	1,440
Prisoners who have died in captivity	4	93
Died of disease	254	10,154
Accidental deaths	14	407
Total deaths in South Africa	800	16,266
Missing and prisoners (excluding those who have been recovered or have died in captivity)	8	560
Sent home as invalids	2,379	53,106
Total South African Field Force	3,187	69,932
Totals	7,174	156,130

The British forces now compose what is described as a short service army. This term distinguishes it from the army of a generation ago. In the army, as it existed prior to 1873, men enlisted for 21 years, and at the end of that time were discharged with a pension. In 1873 this long service system came to an end, and in its place there was established what is now known as the short service plan. Under this men enlist for 12 years. Most of them spend seven years with their regiments, and are then passed into the army reserve for the remaining five years of their term. This passing of men from the colours to the reserve makes it necessary in time of peace to recruit about 35,000 new men every year. The short service system is often the subject of much criticism; but it has always to be remembered, as Lord Wolseley, then Commander-in-Chief, told a meeting at York in 1897, that the short service system was adopted in 1873 simply because men would no longer enlist for twenty-one years.

About the time the short service system was established, what is known as the territorial system also came into being. Formerly infantry regiments were known by numbers, and generally in addition by titles which belonged characteristically to the regiments, or which commemorated some event or incident of outstanding importance in regimental history. Nowadays and since the early seventies, infantry regiments are known by the names of counties. When the re-arrangement took place regiments were assigned by name to this or that county, and their depots were then established in the neighbourhoods from which the regiments then took their names.

The casualties in the principal actions of the war during 1899-1900, before it lapsed into the guerilla stage, are set out in the accompanying table:—

There are now 69 of these depots, and English, Welsh, Scotch and Irish county names are borne by the various regiments. The idea at the bottom of the territorial plan was to give regiments territorial connections, to make them locally popular, and as far as was practicable to mass soldiers hailing from the same part of the country into regiments officially connected with the counties from which the men came. To this end, since the seventies, it has been the practice to recruit regiments from the parts of the country in which their depots are situated. No matter where the main body of the regiment may be stationed, at Aldershot, at the Curragh, in India, or in Malta, its depot remains in the neighbourhood to which the regiment is titularly attached. A staff of commissioned and non-commissioned officers of the regiment is stationed at the depot. There the recruits are received; they are put through a long and hard course of preliminary training, and at the end of this course are drafted from the depot to the colours.

Recruiting officers are permanently stationed in most of the large English towns and cities, and frequently these officers go on special duty into the country villages. London is, however, the great recruiting ground of the army.

A man who offers for the army may enlist for 12 years, the whole of which period is spent with the colours, or he may enlist for part of the term with the colours and the remainder of it with the reserve. The 12 year enlistment plan applies to the regiment of household cavalry, to the corps of ordnance artificers, to the band of the Royal Military College, the corps of army schoolmasters, the corps of armourers, bandsmen in the foot guards, royal engineers who enlist for appointment as military machinists, and men enlisted for appointment as sergeant master tailors. Less than 2,000 men on an annual average enlist under this 12 year plan All boys between 14 and 16, who are accepted to be trained as musicians, trumpeters, drummers, buglers, or tailors, must join for 12 years. The shorter service system, on the other hand, applies to cavalry of the line, royal artillery, infantry of the line, ordnance store corps, who serve seven years in the army and five in the reserve; the army service corps, who serve three years in the army and nine in the reserve; the foot guards and the medical staff corps, who serve seven years in the army and five in the reserve; royal engineers who serve seven years in the army and five in the reserve; and the post office corps and royal engineers of the telegraph and railway reserve, who serve three years in the army and three in the reserve.

The age and physical conditions governing acceptance for the various services in the army in time of peace are as follows:—

CHEST MEASUREMENT AND WEIGHT.

The minimum chest measurement is fixed at 33 in., and the minimum weight at 115 lbs.; but the chest measurement and the weight of each recruit depend upon his height and the arm of the service he wishes to join, and are left to the discretion of the approving medical officers.

It is still possible under the short service plan for soldiers to re-enlist and to serve for 21 years. After this length of service has been put in, soldiers become entitled to pensions. For privates and gunners, the pension is from 8d to 1s 6d per day; for non-commissioned officers, 1s 3d to 3s 6d per day; for warrant officers, 2s to 5s per day. Soldiers discharged on account of wounds or injuries received in action, or for sickness incurred in the performance of their military duty, are entitled to a pension varying with the extent of the disability and with the length of service.

The daily rates of pay of the several ranks in the different arms of the service are as follows:—

A soldier who has been in the army for not more than three months may claim his discharge on payment of £10. After three months the sum is £18, and in this case the permission of the commanding officer is necessary. Discharges by purchase, however, are allowed to the fullest extent consistent with the requirements of the service, and at ordinary times a soldier finds no difficulty in purchasing his discharge.

Until 1871, commissions in the army were bought and sold. Commissioned officers nowadays are drawn from the military academies at Woolwich and Sandhurst; and admission to these schools is obtained only after stiff examinations have been passed. In the army, promotion is by seniority. The pay of a lieutenant is 5s 4d a day; of a captain, 11s 7d a day; of a major, 16s a day; and of a lieutenant-colonel, 21s a day. There are some other allowances; but the pay and allowances of officers are not sufficient to maintain them in the style which, according to the social traditions of most regiments, officers are expected to keep up. Comparatively few of them are dependent entirely on their army pay.

What are described in England as the auxiliary forces comprise the militia, the volunteers, and the yeomanry cavalry. The militia is the oldest of these services. It is older than the standing army, and until the second or third decade of the nineteenth century all men not suffering from bodily infirmities due to age or other causes, and not specially exempted, were liable to be drawn by ballot for the militia. They could serve either personally or by substitute. Ballots were taken in counties until 1830 to make up the quota of militia each county was compelled by the law of 1760 to equip and maintain.

The militia is a local force, each regiment being raised in the division of the county in which the regiment has its head-quarters. It is called out each year for a period of training which cannot exceed 56 days. The men enlist for six years, and when under training their pay, their discipline, and the general conditions of their services are very similar to the conditions in the regular army. Until as late as 1871 the militia regiments in each county were nominally under the command of the lord lieutenant of the county; and nowadays, although there are examinations for officers' commissions in the militia, in issuing these commissions the War Department gives preference to local landed gentlemen who are recommended or nominated by the lords lieutenants, the King's representatives in the counties. In connection with the militia there is a reserve consisting of men who have accepted extra bounties to hold themselves in readiness to serve abroad if need be in the regular army.

The yeomanry cavalry, which in 1900 was given the name of the Imperial Yeomanry, in its old form was a volunteer force, dating back to the Napoleonic wars. It was composed chiefly of tenant farmers. Many of the great landlords made it a condition in their farm leases that their tenantry should be of the yeomanry. For a long time the yeomanry was but lightly regarded as an auxiliary force. New life, however, was infused into it

during the war. Its numbers were greatly increased; and under a royal warrant of the 17th April, 1901, the force was reorganized. It then became permanently the Imperial Yeomanry. The old brigade organization was abolished, and the force is now organized in regiments of four sections, with a regimental staff and a machine gun section. The regiments are under training in camp for sixteen days each year.

Members of volunteer corps are enrolled for three years, and are compelled to put in sufficient time at the drill hall, on the parade ground, and at the rifle ranges, to make themselves efficient, and to pass the annual inspection before an officer from the War Department. Non-efficient volunteers can be sued in the courts for any loss falling upon their regiment in consequence of their failure to earn the Government grant. The officers are drawn from the ranks of the professional and commercial classes. There is no pay to the holder of a volunteer officer's commission. On the contrary, he incurs considerable expense in connection with his office, a fact which accounts for vacancies in many of the volunteer corps.

THE BRITISH NAVY IN 1901-1902.

The sum of £30,875,500 will be expended in 1901-2 on the British Navy, and on additions to the fleet. This is the amount which was asked for by the Admiralty on March 19th, 1901, and subsequently voted by Parliament. In 1900-1 the amount was £28,691,000, so that in 1901-2 there will be expended on the navy £2,183,000 more than in 1900-1. Of the additional expenditure £233,000 represents the additional cost of manning the fleet, due to the larger number of men who will be in service in 1901-2. On ship-building there will be an increase in expenditure of £1,274,900, as compared with the amount voted for ship-building for 1900-1; and on armaments the increase in 1901-2 is £137,300.

The number of men allowed for in the estimates of 1901-2 is 118,625, an increase of 3,745 over the number for which Parliament voted pay in the naval estimates of 1900-1. These 118,625 men will be on the active list. In addition there will be about 28,650 men in the Royal Naval Reserve; and 7,300 in a recently established naval force known as the Royal Fleet Reserve. In the event of war there will be according to the Admiralty figures 154,575 men available for the manning of the fleet.

Mr. Arnold-Forster, the Secretary of the Admiralty, in submitting the estimates to the House of Commons on March 19th, stated that the vote for ship-building for 1901-2, which was £9,003,256, was the largest sum Parliament had ever been asked to vote in one session for new ships. "We have," he said, in describing the ships now in building, and detailing the ship-building programme for 1901-2, "completed or commenced, or asked authority to commence, twenty-three battleships. Of these five the *Canopus*, the *Glory*, *Albion*, *Goliath*, and *Ocean*, are already complete. Others are in various stages of completion, and we are asking authority to commence three more battleships, for which the designs are not yet completed. As to cruisers, we have commenced or asked authority to commence thirty. Of these the large majority are armoured cruisers, a class of vessel which is very largely required at the present time. One is already completed, and a large number are in an advanced state, and we hope will be soon available. The delays in construction have been owing to various causes, but the causes which have been responsible for those delays have diminished, are diminishing, and will pass away altogether. One of the greatest causes of delay has been in the supply of armour, and the answer to that problem is the great change in the form of armour now required. The whole method of making armour has been revolutionized. The whole plant of the armour-makers has had to be reconstructed, and that has taken time. A very large programme of armoured battleships and cruisers was announced, and that had the effect which the Government anticipated, and the great armour manufacturers had in consequence expended enormous sums of money in providing plant. We are now getting an unparalleled delivery of armour. I admit, with knowledge of what I did not before possess, that a large part of the delay is still due to the engineers' strike. That may seem a far-fetched cause, but while ships of the *Diadem* class which were ordered prior to the strike were completed before contract time not one single ship after the engineers' strike has been completed within contract time. We are all agreed that this question of arrears is deplorable. We have not built ships as quickly as we want them, but the arrears have not been anything approaching to what we have been led to suppose by criticisms in the press. I have particulars before me of the rates of building in all the great countries of Europe and the United States, and I find we still hold prominence in the matter of building our ships. If we take the last four ships, the *Albion*, *Canopus*, *Goliath* and *Ocean*, they have been completed in two years eleven months and three years respectively, while Russian ships have taken eight years or six years and three months, and a French ship, the *St. Louis*, five years and five months, and the *Gaulois* three years and nine months. The only Power which has approached us has been Germany, which built one ship in three years and ten months. Therefore, though there has been delay it is not so serious as some people would have us suppose."

"We propose," continued Mr. Arnold-Forster, in coming to details as to the ship-building programme of 1901-2, "to commence this year three battleships, six first-class armored cruisers, two third-class cruisers, ten destroyers, five torpedo boats, and five submarine boats.' Concerning these submarine boats, Mr. Arnold-Forster made an interesting statement as to the attitude of the Admiralty towards them. "We have," he said, "a great deal of information about submarines. We do not attach to them an exaggerated importance, but an ounce of fact is worth a ton of theory, and when our officers and men see for themselves what these boats can do, they will learn more about them than any reports could tell them. The motor to propel these boats is the main point. If you can add speed to their other qualities they might become formidable vessels. We are comforted by the judgment of the United States and of Germany, which is hostile to these inventions, but we must regard our own situation, and it is not entirely the

same as that of other nations. Our problem is that we live in the narrow waters of the Channel."

Mr. Arnold-Forster had prefaced these statements as to the naval programme for 1901-2 by a review of the work of the Navy in China, in which were some significant references to Canada and the Australasian colonies. "We had had proof in the recent operations in China, in the expedition for the relief of Pekin," he said, "of the adequacy of the Navy for the calls upon it. He was there as the mouthpiece of the Admiralty, and was glad of their assurance that the conduct of the naval contingent in China had been admirable. The gallant contingent who accompanied Admiral Seymour in the attempt to relieve Pekin was all that could be desired of British sailors, and the conduct subsequently of the naval detachment under the orders of General Gaselee was equally creditable. Nor could he pass on without a word of tribute to the effective service rendered by the Australian contingents. For the first time since the war of 1812 we had a colonial naval force taking an active and effective part in the naval work of the Empire. We had had three Australian contingents—the contribution from H.M.S. *Protector* and two other contingents from New South Wales and Victoria—engaged in the defence of Pekin, and testimony had been borne both by naval and military officers to the effective service they rendered, and also to the excellent behaviour of the men. He indulged the hope that the remarkable precedent set almost on the day of the birth of the great Australian Commonwealth might some day—some not distant day—be imitated to the advantage of the Empire by the equally great Dominion of Canada."

It has long been the policy of the British Admiralty to build part of the new tonnage in the Government dockyards, and part in private yards. Of the twenty-eight new vessels (not counting submarine boats) sanctioned by Parliament in 1901 two battleships, one armoured cruiser and two sloops will be built in royal dockyards, in which there are now about 32,000 men at work.

The accompanying figures, covering battleships and all descriptions of cruisers (armoured, protected and unprotected) built or in building, show the comparative naval strength of Great Britain and six other powers on the 15th of January, 1901:

*Armoured cruisers—built, 9; in building, 20; protected cruisers—built, 103; in building, 4; unprotected cruisers, 11; total, 147.

New arrangements were come to in 1901 between the Admiralty and nearly all the great British steamship companies, by which their finest vessels are held at the disposition of the Admiralty for employment as armoured cruisers when required. Under the previous agreements only the Cunard, White Star, Peninsular and Oriental, and Canadian Pacific Railway companies were included. To these have now been added the Orient, Royal Mail and Pacific companies. Eighteen of the largest and swiftest passenger steamers belonging to these companies now receive an annual subvention, and thirty steamers in addition are held at the disposition of the Admiralty without further subsidy.

Like the English Army the Navy is manned by volunteers, and there is no compulsory service in connection with it. A large proportion of the seamen enter the service as boys. They are accepted for training-ships up to the age of eighteen, and when a boy reaches the age of eighteen his term of actual service in the Navy begins, and must last for at least twelve years. To be accepted for a training-ship, a boy between the age of fifteen and fifteen and a half must be five feet and half an inch in height, with a chest measurement of thirty and a half inches. The height measurement is made without shoes. If accepted when between fifteen and a half and sixteen a boy must be five feet and one and a half inches in height, and thirty-one inches round the chest. Between sixteen and sixteen and a half a boy must be five feet two and a half inches in height, and thirty-one and a half inches round the chest.

The pay of seamen ranges from one shilling and three pence a day for ordinary seamen, to nine shillings a day for chief gunners and boatswains. Men who have put in nine years' service in the Navy can pass into the Coast Guard Service. Those who stay in the Navy for a period of twenty-two years become entitled to pensions. The amount of pension is from eighteen pounds a year, upwards, according to the rating on retiring from the ranks. The average pension for men of all ranks is £31 a year.

The Naval Reserve, as the result of changes which were made in 1901-2, is now of two branches, the Royal Naval Reserve and the Royal Fleet Reserve. The Naval Reserve is composed of men ordinarily in the merchant service, who put in a certain number of days training each year on board coast-guard ships, and who are liable to be called upon for service afloat in the event of war. The Fleet Reserve consists of men who have served twenty-two years in the Royal Navy and earned pensions, and of men who have served twelve years in the navy and have then transferred themselves to the Fleet Reserve. As with many seamen in the Royal Navy Service, for pension begins at eighteen years of age, there is always a large proportion of pensioners who are in the prime of life. Before the Fleet Reserve was established many of these men were of the Seamen Pensioner Reserve. In future in the case of men who receive pensions it will be obligatory on them to join the Fleet Reserve.

For the work of the British Navy the world is divided out into nine stations. "Except for the small squadron France keeps off Newfoundland, and for the fleets of the States of the American Continents, we alone," said Mr. Goschen, in describing the naval-stations in his speech of March 10th, 1898, "have squadrons where other nations have isolated ships. When we have to reinforce our foreign squadrons we send out fully-manned and fully-commissioned men-of-war, so that at all times, besides our squadrons, we have traversing the seas a certain number of ships in commission, ready for war, if war should occur, at any moment."

In respect to coaling-stations, as in respect to the size of the fleet, Great Britain is admittedly without a rival. On the trade route from England to the East, by way of the Suez Canal, Great Britain has coaling-stations at Gibraltar, Malta, Aden, Ceylon, Singapore, Wei-hai-wei and Hong Kong. On the older route to the East, by way of the Cape, there are British coaling-stations at Sierra Leone, St. Helena, Capetown, Mauritius. In the West Indies the coaling-stations are at Port Castries on the Island of St. Lucia, and at Port Royal, Jamaica. Bermuda and Halifax are the coaling-stations in the North Atlantic. Esquimalt is the station for the North Pacific; and in Australia the stations are on King George's Sound and on Thursday Island. Nearly all the stations are on islands, and are well defended. Gibraltar and Malta are regarded by naval experts as the only coaling-stations liable to serious attack, and they are so open to attack because both of them are within easy distance of European ports. Both of them, however, have exceptionally powerful defences.

THE MILITIA LIST—DOMINION OF CANADA,

ALSO WAR SERVICE OF OFFICERS, ALPHABETICAL LIST OF RESERVE OFFICERS, OFFICERS OF THE STAFF AND PERMANENT FORCE (ACCORDING TO GRADATION LIST), CANADIAN TROOPS SENT TO SOUTH AFRICA (WITH LIST OF DEATHS), ETC.

(Condensed and corrected, by the Militia General Orders, to October, 1901.)

As it is impossible to obtain the Post Office address of every individual officer, it is suggested that communications be sent (when no other address is given) to the Head Quarters of the Corps or Company, as the case may be. The star (*) before a name denotes War Service.

MILITIA AND DEFENCE OF CANADA.

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax, and a naval establishment there and on the Pacific coast.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, but is practically embodied in the present Militia Act, 49 Vic., chap. 41 (Revised Statutes, 1886). By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows:—

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Judges, clergymen and ministers of all religious denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The number of men to be trained and drilled annually is limited to forty thousand, except as specially author-

ized, and the period of drill is to be sixteen days and not less than eight days each year.

The Militia is divided into Active and Reserve land and marine force. The Active land and marine force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service is three years.

THE LAKE ST. JOHN TERRITORY.

The territory in question extends from the head of navigation of the river Saguenay, at Chicoutimi, to the northern boundary of the Province of Quebec, a distance of 220 miles, and from the sources of the waters flowing into Lake St. John, from the East, to the river St. Maurice, and embracing the valley of the river Batiscan, a distance of 200 miles, the whole forming an area of 44,000 square miles or about 28,000,000 acres. Comparatively little is known of this great country, with the exception of the valley of Lake St. John, which, within the last few years, has been colonized with great rapidity, and now contains a population of some 40,000.

The Saguenay and St. Maurice regions are already the field of large lumbering operations, estimated at 60,000,000 feet, B.M., per annum, or equivalent to nearly one-fourth of the whole export of sawn lumber from the port of Quebec. The country is thus described by a gentleman who visited it recently:

The Soil "Is almost universally composed of a rich grey clay, the land seems to be inexhaustible. At Pointe-aux-Trembles I was shown a field of wheat, which had been producing that grain for the last fifteen years, without the application of any manure; and the grain I saw this year was as fine as any to be found in this district. Truly one is struck with wonder at the richness of the soil, for I believe there is none richer in Canada."

The climate of the Lake St. John region is said to be that of Montreal; there is no doubt of its being superior to that of Quebec. The snowfall is certainly less. In fact, farmers complain that they do not get good sleigh roads till late in the winter. On the 25th September this year I remarked that the leaves of the trees were very little tinted, and potato stems were still green. Wheat and all grains ripen and produce abundantly, as may be seen from the following extracts taken from the census returns:

	1861.	1871.	1881.
Wheat, bushels	10,912	136,099	154,589
Oats, "	39,316	117,249	211,216
Barley, "	30,922	71,210	47,025
Other Grains	.....	.....	108,183
Potatoes, bushels	101,382	156,996	287,238

	1861.	1871.	1881.

Butter, pounds	61,777	148,106	393,127

Tobacco, pounds	.....	.....	67,437
Population	10,478	17,493	32,409

Potatoes, carrots and other vegetables yield abundantly and are of immense size. Wheat is of course the great test of the soil and climate of any agricultural country. Let us then compare its production at Lake St. John with the best districts of the Province, viz: The Eastern Townships, and we find that the census returns show in 1881:—

	Population.	Bush. Wheat.	Bush. per 1000 of pop.
Chicoutimi	32 409	154,589	4,800
Compton	19,581	34,181	1,800
Stanstead	15,556	37,727	2,400
Huntingdon	15,495	24,378	1,600

Comparison between the temperature, and snow-fall at Roberval and at other places in Canada, each winter season (from January to March inclusively) and each summer season (from July to September inclusively). The observations for Roberval extend from April 1888 to May 1890, inclusively; those for Moose Factory, James Bay, from the year 1877 to the year 1882. All these observations are taken exclusively from the official reports of the Meteorological Department at Toronto.

United Kingdom, and the following British Possessions and Protectorates: Aden, Ascension, Bahama Islands, Barbados, Bermuda, British Central Africa, British East Africa, British Guiana, British Honduras, British India (except offices on the Persian Gulf), British North Borneo Company's Territory, including Labuan, Cape Colony, Ceylon, Cyprus, Falkland Islands, Fiji, Gambia, Gibraltar, Gold Coast Colony, Hong Kong, Jamaica, Johore, Lagos, Leeward Islands, Malay States, Malta, Mauritius, Natal, Newfoundland, New Zealand (1 Jan., 1901), Niger Coast Protectorate, Niger Company's Territory, Orange River Colony, Sarawak, Seychelles, Sierra Leone, Straits Settlements, St. Helena, Tobago, Transvaal, Trinidad, Turks Islands, Uganda, Windward Islands, Zanzibar. — Postage on Letters, 2 cts. per half oz.

Foreign Countries, except United States.—Postage on Letters, 5 cents per half oz. If sent unpaid, double postage will be charged.

United States.—The rate on letters to the United States is the same as in Canada, and at least one rate must be prepaid.

It is very important to bear in mind that the postage upon letters for the United Kingdom and all Foreign Countries is calculated by the *half ounce* and *double* postage is charged on all unpaid letters.

Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration in addition to the Postage is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a Registered Letter can be traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

Book Post, &c.

A Book Packet may contain any number of separate books. Limit of weight for domestic post, 5 lbs. (unless consisting of a single book, in which case a weight of 7 lbs. is allowed); for foreign post, 4 lbs. Limit of size, two feet in length, or one foot in width or depth.

Book packets must be open at *both ends or both sides*, and must not contain any letter or sealed inclosure.

Books for the use of the blind are free of Canada postage, and correspondence passing between blind persons in raised characters is chargeable at the rate of 1 cent per 2 ozs.

The rate on Book Packets between any two places in Canada is 1 cent per 4 ozs., which must be prepaid by stamps.

The rate to Great Britain, the United States and all Postal Union Countries, is 1 cent per 2 ozs.

Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations of the British Post Office do not admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred to under that head may be forwarded to the United Kingdom by Book Post:—

1. On all pamphlets, occasional publications, printed circulars, catalogues (in which may be included printed order lists), prices current, hand-bills, and other matter wholly in print, and on packages of seeds, cuttings, but *not cut flowers*, bulbs, roots, bedding plants, scions or grafts, the rate is 1 cent for each 4 ozs. or fraction thereof.

2. On maps, prints, drawings, engravings, plans and specifications, lithographs, photographs when not on glass or in cases containing glass, circulars produced by a multiplying process easy to recognize, botanical, natural history and entomological specimens when properly put up so as to prevent injury to the contents of the mails, visiting cards, whether printed, engraved

or written, sheet music, whether printed or written, stitched or bound, book or newspaper manuscript whether type-written or hand-written, printer's proof-sheets whether corrected or not and accompanying manuscript copy, such partly printed and partly written documents as deeds of land, wills, mortgages made under seal (including chattel mortgages), insurance policies, renewal receipts when attached to the policies, insurance receipts sent in bulk from head offices to agents, militia and school returns, customs manifests, bank pass books, also pass books of building, loan and investment societies, stubs of receipt books and other books of similar character, manuscript note-books, minute books, voters' lists when written or partly in writing, school or college examination papers, municipal assessment rolls, partly printed and partly written Dominion and Provincial Government documents, statute labour returns, municipal returns in general, exhibitors' entry tickets for provincial and other agricultural and industrial exhibitions, blank books, photograph albums with or without photographs, printed forms entirely without writing, or filled in with figures only, and official or private post cards either wholly blank or printed as circulars or as forms to be filled up, and with or without a printed or written address, and indented or perforated sheets of paper containing characters which can be read by the blind, the rate of postage is 1c. for each 2 ozs. or fraction of 2 ozs.; and the postage rate must in every case be prepaid by postage stamps or stamped post bands or wrappers. No letter or other communication intended to serve the purpose of a letter must be sent or inclosed in any such package or thing mentioned, and the same must be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision; (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged).

No packet of miscellaneous matter can be transmitted by mail if it exceeds 5 lbs. in weight, 30 inches in length or 12 inches in width or depth, nor may the combined length and girth of any packet exceed 6 feet.

Legal and commercial papers generally are liable to *letter rate* of postage; the exceptions are restricted to the documents above specified, such as Deeds and Insurance Policies.

Printed or written *requests for return* are recognized on 3rd and 4th class matter, addressed to places within the Dominion, and same will be *returned direct to the sender*, subject to the payment by the sender, on delivery to him through the Post Office, of the full amount of postage to which the article was in the first place liable, together with any charges rated thereon on account of any deficiency in the original prepayment.

Newspapers and Periodicals.

The general postage rate on newspapers and periodicals *published in Canada* not less frequently than once a month, and addressed to regular subscribers in Canada, the United States and Newfoundland, and to newsdealers in Canada, is fixed by law at ½ cent per pound. The following exception, however, is to be noted: Newspapers and periodicals published not *more* frequently than once a week and not *less* frequently than once a month, are entitled to pass free to regular subscribers and newsdealers in Canada within a circular area of 40 miles in diameter, having as centre either the place of publication or any established Post Office not more than 20 miles distant therefrom, the choice of a centre within these limits resting with the publisher; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, other than those addressed to regular subscribers or news agents, from office of publication, the rate is *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp.

Newspapers and periodicals weighing not more than 1 oz. each may be posted singly, if prepaid by Postage Stamp ½ cent each.

The postage on *bona fide* specimen newspapers, and on papers and periodicals published less frequently than once a month, is 1 cent per lb.

British and foreign publications received by mail may be re-posted in Canada to subscribers in Canada at the rate of 1 cent per lb. They cannot however be posted at that rate for local delivery at places where there is a free letter carrier service.

Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canadian newspapers sent from the office of publication, and British and foreign newspapers posted by news agents for regular subscribers* in Canada. When addressed to any place within the Dominion, or the United States, they must be prepaid the following rates by Postage Stamp:—

If posted singly and weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

The newspaper rate to England, whether for transient newspapers or for those sent to regular subscribers, is 1c. per 2 oz. by whatever route they may be forwarded.

Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not exceeding 24 oz. in weight, except samples of tea, which must not exceed 8 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 1 cent per 4 oz., under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided the deficiency does not exceed 5 cents.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

Liquids, oils, etc., may be sent by mail in the Dominion if put up carefully in strict accordance with the directions given in the Postal Guide and ascertainable at any post office.

United Kingdom, United States and Foreign Countries.

Patterns and samples of Merchandise, when addressed to places in the United Kingdom, must not exceed 5 lbs. in weight; to the United States and other foreign countries, 12 oz.; and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Samples of liquids, oils, glass, etc., are admitted as samples provided they are put up in strict accordance with the directions given in the Postal Guide.

Useful Hints.

Register all valuable letters. Transmit money by Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of missent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County* and *Province* in which the office addressed is located. Place stamp on the right hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp*. When stamps are moistened the gum is apt to be removed.

Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following Regulations:—

1. The dimensions of a Parcel must not exceed 2 feet in length by 1 foot in width or depth.

2. A Parcel must not contain any explosive, combustible, or dangerous articles.

3. All Parcels must be securely and substantially packed and closed.

4. Oils, liquids, etc., can only be forwarded if put up with the same security required in connection with their transmission as samples in the ordinary mails. Fragile articles should be packed with special care.

5. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the parcel is intended.

6. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel, also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Custom duties, and under existing regulations must be examined for the purpose by an Officer of the Customs *in the presence of the persons addressed.*

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Prepayment by postage stamp is required in all cases. Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

Fourth Class Matter.

Postage rate one cent per ounce or fraction of an ounce, to be prepaid by postage stamp. Miscellaneous articles of merchandise, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, nor entitled to pass as 3rd class matter, may pass as 4th class when addressed to any destination within the Dominion or the United States. Fourth class matter must be so packed or put up as to be open to examination of contents and must not exceed 5 lbs. in weight. The limit of size is 30 inches in length by 1 foot in width or depth, but the combined length and girth of any packet must in no case exceed 6 feet. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 4th class matter is 5 cents in addition to postage.

A packet of 4th class matter may contain invoices and accounts, provided they relate exclusively to the contents of such packet; it is also permitted to enclose a card or slip of paper giving in a brief manner necessary directions for the identification or treatment of the article or articles contained in the packet. Care must be taken not to abuse this privilege by converting such notes or marks, designed solely for the facilitation of business between the sender and the addressee, into what might properly be called correspondence. A packet of 4th class matter containing a letter or any writing intended to serve the purpose of a letter in the ordinary sense will become liable to letter postage, and the sender will incur the penalty provided by law.

When several separate articles are enclosed in a packet of 4th class matter, there is no objection to each bearing a distinguishing number, so as to enable the sender to give directions by letter (sent of course separately and duly prepaid) respecting the several articles which the packet contains.

Prohibited Articles.

All explosive, dangerous or destructive substances, glass bottles or glass in any form liable to break, and all matter subject to speedy decay, all obscene or immoral books, publications, pictures, etc., libellous post cards and letters the covers of which bear words of an offensive character, and letters and circulars relating to illegal lotteries or other fraudulent schemes.

Foreign Post—Commercial Papers.

"Commercial Papers" are understood to comprise all papers or documents written or drawn wholly or partly by hand (except letters or communications of the nature of letters or other papers or documents having the character of an actual and personal correspondence), documents of legal procedure, deeds drawn up by public functionaries, copies of or extracts from deeds under private seal and (whether written or printed on stamped or unstamped paper) way bills, bills of lading, invoices and other documents of a mercantile character, documents of insurance and other public companies, all kinds of manuscript music, the manuscript of books and other literary works. The rate is 1 cent per 2 ozs., but each packet must have a minimum prepayment of 5 cents; this prepayment will cover a weight of 10 ozs. No packet must exceed 2 feet in length or 1 foot in width or depth, unless in the form of a roll, when a length of 30 inches is allowed, provided the diameter does not exceed 4 inches. The weight must not exceed 4 lbs.

In sending money by mail it is always best to transmit by Money Order if possible.

In the foregoing list the asterisk denotes members of the English House of Lords entitled to the designation of "Right Honourable." Barons Aylmer and de Blaquière are of the peerage of Ireland and not members of the House of Lords. The title of Baron de Longueuil existed prior to the Treaty of Paris (1763), and was duly recognized by Queen Victoria pursuant to that treaty. Sir Wilfrid Laurier is styled Right Honourable as a member of the English Privy Council. Members of the Canadian Privy Council are designated above by a † and have also the title of Honourable. Judges are distinguished by a ‡ and are also by courtesy or custom Honourable. The English practice is to give the title of Knight Bachelor to members of the Judicial bench, and the Attorney and Solicitor-Generals. Sir Samuel Henry Strong, Chief Justice of the Supreme Court of Canada, is the Canadian representative on the Judicial Com. of the Privy Council, and consequently Rt. Hon.

The Order of Baronets, the lowest hereditary rank, was instituted in 1611; a Baronet is designated "Sir John Smith, Baronet"—usually written Bart. Taking precedence of Baronets are members of The Most Honourable Privy Council, who are addressed "Right Honourable."

The Order of the Bath, instituted in 1399, and revived in 1725, is divided into three classes—Knights Grand Cross, G.C.B.; Knights Commanders, K.C.B.; and Companions, C.B.

The Order of St. Michael and St. George, instituted in 1818, has also three classes—G.C.M.G., K.C.M.G., and C.M.G.

In all Orders of Knighthood the Knights Grand Cross and the Knights Commanders have the prefix "Sir" with the initials of their class following the name. Companions bear no title, but have the letters C.B. or C.M.G., as the case may be, attached to their names.

Knights Bachelors are gentlemen who have received the honour of Knighthood, and are entitled to the prefix "Sir" and to "Knt." at end of name.

It follows that members of any order of Knighthood may be entitled to several prefixes and affixes, as: Field Marshal The Rt. Hon. Lord Roberts of Kandahar, K.P., G.C.B., G.C.S.I., G.C.I.E., V.C.; The Rt. Hon. Sir Wilfrid Laurier, G.C.M.G.; The Hon. Sir C. Tupper, Bart, G.C.M.G., C.B.

THE GOVERNMENT DEPARTMENTS.

THE TREASURY.

Chancellor of the Exchequer—Sir Michael Hicks-Beach.
First Lord of the Treasury—Right Hon. A. J. Balfour.
Financial Secretary to the Treasury—Joseph Austen Chamberlain.
Patronage Secretary to the Treasury—Rt. Hon. Sir William Walrond.
Junior Lords of the Treasury—H. T. Anstruther, W. Hayes Fisher, Victor Cavendish.

The Treasury, of which the Chancellor of the Exchequer is the political head, provides the means for meeting the charges for the military, naval, and civil services. The Parliamentary heads of each of the spending and administrative departments of the Government are responsible for the estimates for their respective departments; but it is the duty of the Chancellor of the Exchequer, with the permanent Secretary to the Treasury, to check all these estimates before they are submitted to the House of Commons in Committee of Supply. The Cabinet becomes responsible for estimates which have been submitted to Parliament, and the rejection or reduction of an estimate by the House of Commons is tantamount to a defeat of the Government. The duties which bring the Chancellor of the Exchequer most prominently before the country, are those in connection with the Budget. The first Lord of the Treasury is one of its Parliamentary heads; but the duties of the First Lord are little more than nominal, and the office is usually held by the Leader of the House of Commons. The Patronage Secretary to the Treasury is the official title of the Government whip in the House of Commons. The Junior Lords are his assistants. The Financial Secretary represents the Treasury in the House of Commons.

THE FOREIGN OFFICE.

Secretary of State for Foreign Affairs—Marquis of Lansdowne.
Under Secretary for Foreign Affairs—Visc't Cranborne.

All diplomatic intercourse is conducted by the Secretary of State for Foreign Affairs, who is usually of the House of Lords. The office is next in rank and importance to that of Premier, and is sometimes held in conjunction with that office. Ambassadors and consuls receive their instructions from the Foreign Office. Foreign ambassadors in London have their audiences with the Chief Secretary, and he also conducts the negotiations for international treaties. The Under Secretary represents the Department in the House of Commons.

THE COLONIAL OFFICE.

Secretary for the Colonies—Right Hon. J. Chamberlain.
Under Secretary for the Colonies—Earl of Onslow.

The Colonial Office dates back to 1660, when a Committee of the Privy Council was appointed for the Plantations, as the Colonies were then called. This Council was continued until 1768, when colonial affairs were placed under the control of a Secretary of State. When the United States secured their independence in 1783, the office of Colonial Secretary was abolished, and colonial affairs were managed from the Home Office. In 1794 the colonies were placed under the care of the Secretary of State for War. This arrangement was continued until 1854, when the War Department was reconstructed, and separate Secretaryships of State were established for War and for the Colonies. The colonies are divided into three classes. In the first are the Crown colonies, in which the Crown has entire control of legislation, and which are administered from the Colonial office. Hong Kong and Cyprus are examples of Crown Colonies. In the second class are the colonies with representative institutions, but not responsible government. In these the Crown has a veto on legislation and retains control of the public offices. Such colonies are Ceylon and Newfoundland. The third class includes the colonies having responsible government, such as Canada and the Australasian colonies.

THE INDIA OFFICE.

Secretary for India—Lord George Hamilton.
Under Secretary for India—Earl of Hardwicke.

The India Office in its present form dates from 1858, when an Act of Parliament was passed which directed that all the powers and duties hitherto exercised by the old East India Company, or the old Board of Control, should in future be exercised and performed by one of His Majesty's Principal Secretaries of State. At the same time there was established a council to assist the Secretary for India. It consists of not less than ten members nominated by the Secretary. The majority of these members must be men who have served or resided ten years in India, and have not left India more than ten years previous to the date of their appointment. Members hold office for ten years, and under the direction of the Secretary for India, conduct all the business transacted in London in relation to the government of India.

THE HOME OFFICE.

Home Secretary—Rt. Hon. Charles T. Ritchie.
Under Secretary—Rt. Hon. Jesse Collings.

The Home Department has the control of the London police force, and also the oversight of the police forces

in the counties and municipal boroughs; and generally speaking the Department is responsible for the internal peace of the country. Prisons, convict establishments, criminal lunatic asylums, executions, and all matters connected with the post-judicial execution of the criminal law, come within the purview of the Home Office. It is also responsible for the administration of the factory code, and the laws relating to mining.

THE WAR OFFICE.

Secretary for War—Rt. Hon. Wm. St. John Brodrick.
Under Secretary for War—Lord Raglan.
Financial Secretary for the War Office—Lord Stanley.

The Secretary for War has control of the army at home and abroad, and is responsible for its efficiency to the Sovereign and to Parliament. He directs all movements of troops, and all appointments made by the Commander-in-Chief are subject to his approval.

THE ADMIRALTY.

First Lord of the Admiralty—Earl of Selborne.
Secretary to the Admiralty—H. O. Arnold-Forster.
Civil Lord of the Admiralty—Captain E. G. Pretyman.

The Admiralty, which has charge of the Royal Navy, is administered by Lords Commissioners. The head of the Department, who is always of the Cabinet, is known as the First Lord of the Admiralty. The other Lords Commissioners or Junior Lords are Admirals without seats in Parliament, and are respectively at the heads of the departments into which the Admiralty is divided. The foreign movements of ships are at the instance of the Cabinet, the Foreign Office, and the Colonial Office, and it is from these authorities that the Lords of the Admiralty receive their orders. In time of war the orders go from the Cabinet. At other times the movements of vessels are at the instance of the Foreign Office and the Colonial Office.

THE COUNCIL.

Lord President of the Council—Duke of Devonshire.
Vice-President of the Council—Sir John E. Gorst.

The principal duties of this department are now connected with education. The Committee of Council for Education or the Education Department, as it is popularly called, exercises supervision over the various departments of state aided education, and distributes the grants for education annually made by Parliament. These grants date from 1833; and in 1839 the Committee of Council for Education was established. The Vice-President is always of the House of Commons, and he is practically the Minister of Education. On the 1st of April, 1900, the Committee of Council for Education came to an end, and the powers it had exercised since 1839, enormously increased, however, since 1870, were transferred to a new State Department known as the Board of Education. The new Board was created under an Act of Parliament passed in the ordinary session of 1899. It consists of a President, the Principal Secretaries of State (these are the Secretaries for Foreign Affairs, for Colonial Affairs, for the Home Department, for War, and for India), the First Commissioner of the Treasury, and the Chancellor of the Exchequer. With the creation of this new Board there was for the first time a direct and general connection between the Government and secondary schools in England. Heretofore the Committee of Council had been concerned chiefly with elementary education, except as regards the Science and Art Department. Now, however, inspectors representing the Board of Education may visit the secondary schools, and a connection is established between these schools and the municipal councils. With the new Board of Education there was also created a Consultative Committee, which is to keep a register of teachers, and advise the Board on any matters referred to it. Universities and other bodies concerned in education are represented on the Consultative Committee.

THE LOCAL GOVERNMENT BOARD.

President of the Local Government Board—Rt. Hon. W. H. Long.

Parliamentary Secretary to the Local Government Board—Grant Lawson.

This Department dates from the reform of the Poor Law in 1834. From 1834 to 1847 its chief was not of the Ministry nor in Parliament. Up to 1871 it was occupied exclusively with the administration of the Poor Law. In 1871 it took over from the Home Department numerous duties in connection with municipal government and public health, and its title was changed to the Local Government Board.

THE BOARD OF TRADE.

President of the Board of Trade—Rt. Hon. Gerald Balfour.

Parliamentary Secretary to the Board of Trade—Earl of Dudley.

The Board of Trade is in charge of the administration of the laws relating to limited liability companies, to bankruptcy; and it also has the oversight of all matters connected with the mercantile marine, harbours, canals, railways, and street car lines and electric lighting. The Labour Bureau is a department of the Board of Trade. Its work is confined to the collection and compilation of information of all kinds relating to labour. The Board of Trade also collects information relating to trade and commerce abroad.

THE POST OFFICE.

Postmaster-General—Marquis of Londonderry.

The Post Office in England controls the telegraphs, as well as the home and foreign mail departments. The telegraphs have been a Government undertaking since 1869. The Post Office savings banks, of which there are over 12,000, receive sums up to a maximum of £50 in one year, or £200 in all. They also do a life insurance, and an annuity business on lines intended to meet the needs and convenience of the working classes.

THE BOARD OF AGRICULTURE.

Pres. of the Board of Agriculture—Rt. Hon. R. W. Hanbury.

The principal duties of this Department are the administration of the laws for preventing and stamping out cattle disease. It supervises the landing of live cattle imported from abroad.

OFFICE OF PUBLIC WORKS AND BUILDINGS.

First Commissioner of Works—Rt. Hon. A. Akers-Douglas.

This Department has the custody and supervision of all Royal Palaces and parks, and also of buildings such as the Houses of Parliament, the Law Courts, and the public offices at Whitehall.

DEPARTMENT OF THE LORD CHAMBERLAIN.

Lord Chamberlain—Earl of Clarendon.
Vice-Chamberlain of the Household—Sir A. Acland Hood.
Comptroller of the Household—Viscount Valentia.

The Lord Chamberlain's Department has the general supervision of the Royal Household "above stairs," and also various duties towards the Sovereign and the Court. It is through the Lord Chamberlain that presentations at Court are arranged. In cities where there are royal palaces, he acts as the licenser of theatres. The Examiner of Plays is in the Department of the Lord Chamberlain. His sanction is necessary for the production of a play in any theatre in England at which a charge for admission is made.

IRISH AND SCOTCH DEPARTMENTS.

Chief Secretary for Ireland—Rt. Hon. Geo. Wyndham.
Secretary for Scotland—Lord Balfour of Burleigh.

These Departments for Ireland and Scotland respectively exercise functions very similar to those of the Home Department in England.

MINISTERIAL SALARIES.

The salaries received by the members of the Cabinet range from £2,000 to £6,000. The Lord Chancellor has also £4,000 as Speaker of the House of Lords. The political secretaryships and the under secretaryships of departments have attached to them salaries of £1,500 to £2,000 a year. Pensions are granted to such of the holders of Ministerial offices as after their retirement become too straitened in means to maintain themselves in a social position in keeping with the official rank they have held. These pensions are granted irrespective of length of official service. They range in amount from £1,000 to £1,200. At the present time no pensions of this kind are being paid.

THE BRITISH PARLIAMENT.

THE GENERAL ELECTION OF 1900.

As a result of the general election in Great Britain, which took place in October, 1900, and of subsequent by-elections, the House of Commons, which consists of 670 members, is now made up as follows :—

Unionists	403
Liberals, Radicals and Labour Members	185
Irish Nationalists	82
	670

The Unionists have thus a majority of 136. After the general election of 1895 they had a majority of 152. When the Parliament of 1895-1900 came to an end the Government majority stood at 132, having been reduced to that number at the by-elections during the preceding five years. In the accompanying table, which shows the results of the election of 1900 in England, Wales, Scotland and Ireland, political parties are divided into three groups—Unionists, Liberals and Nationalists. Included in the Unionist group are the Conservatives and the Liberal Unionists. The Liberal group includes Liberals, Radicals and Labour members. Excepting the case of Mr. T. P. O'Connor, who sits for the Scotland Road Division of Liverpool as a Nationalist, all the Nationalist members sit for Irish constituencies.

In 237 constituencies returning 243 members there were no contests. At the 1895 general election there were 182 unopposed returns. In an overwhelming majority of these uncontested returns in 1900 the seats went to Unionists. Not more than forty Liberals were returned without opposition. The statistics given below show the number of electors in 1895 and 1900, and the number of those who in each year went to poll.

THE BRITISH CENSUS OF 1901.

The total number of persons returned as living in England and Wales at midnight on Sunday, March 31st, 1901, was 32,526,075. This shows an increase of 3,523,550 upon the number enumerated on April 5th, 1891, and gives a decennial rate of increase of 12·17 per cent., which favourably contrasts with the increase of 3,028,086, or 11·65 per cent. in the previous decennium. The increase is numerically greater than in any previous decennium, but the progression per cent. is lower than in any other decennium of the last century, except those terminating in 1861 and 1891.

Of the 32,526,075 persons enumerated 15,721,728 were males and 16,804,347 females. This gives an excess of 1,082,619 females, an excess which is partially attributable to the fact that men serving in the Army, Navy, and the Merchant Service abroad are excluded from the reckoning. In 1891 the excess was 896,723. To each 100 males enumerated there were 106·9 females. The proportion of females has been steadily increasing at each census since 1851, having been successively 104·2, 105·3, 105·4, 105·5, 106·4, and 106·9 to 100 males.

Inhabited houses number 6,266,496, as contrasted with 5,451,497 in 1891, an increase of 814,999, or 15·0 per cent. For the period ending 1891 the increase had been at the rate of no more than 12·8 per cent.

The population of Scotland was 4,471,957, showing an increase of 446,310 in the 10 years, or 11·1 per cent., against 11,2 and 7·8 per cent. in the two preceding decennia. The excess of births over deaths in the 10 years was 499,768, showing that the loss of population during that period by excess of emigration over immigration was 53,458.

The population of Ireland was 4,456,546, and less by 248,204 than the number recorded at the previous Census in 1891; the decrease, which had been equal to 4·4 and 9·1 per cent. in the two preceding decennia, fell again to 5·3 per cent. in the last intercensal period. The excess of births over deaths in Ireland during the Census period 1891-1901 was equal to 218,222. It follows, therefore, that the loss of population during that period by excess of emigration over immigration must have amounted to 466,426, or nearly half a million. The population of Ireland at the recent Census but slightly exceeded a half of that enumerated at the Census in 1841, and for the first time fell below the population of Scotland, which exceeded that of Ireland by 15,411.

The population of England and Wales in 1901 amounted to 78·4 per cent., or more than three-quarters of the aggregate population of the United Kingdom, showing a further considerable increase upon the constantly-increasing proportions at previous Census enumerations. The population of Scotland and that of Ireland were each approximately equal to 10·8 per cent. of the population of the United Kingdom. The proportion of the Scotch population differed but slightly from that at recent Censuses, whereas the population of Ireland, which in 1821 constituted 32·6 per cent. of the population of the United Kingdom, has continuously declined, and did not exceed 10·8 per cent. at the Census of 1901. The accompanying table shows the proportion per cent. of the population residing in different parts of the United Kingdom:

	1821	1831	1841	1851	1861	1871	1881	1891	1901

It has concurrent jurisdiction in relation to revenue cases and the enforcement of penalties, in cases in which it is sought at the instance of the Attorney-General of Canada to impeach or annul any patent of invention, or any patent case or other instrument respecting lands; cases against Crown officers for anything done or omitted to be done as such officer, and all actions or suits in which the Crown is plaintiff or petitioner.

Admiralty business may be transacted at the office of the Exchequer Court at Ottawa, or at the local registry offices.

There are Admiralty Districts presided over by Local Judges in Admiralty as follows:—

(a) The Province of Quebec constitutes the District of Quebec with Registry at the City of Quebec.

The Supreme Court of Judicature for Ontario.

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals from the High Court of Justice, and from the County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to His Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. Sittings are held at such times and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the five regular sittings being the first Tuesday in March and September, and the second Tuesday in January, May and November, due notice of the time of holding of further sittings being given. If required, a second division of the Court, consisting of Judges of the High Court, can also sit for the disposal of business.

Chief Justice of Ontario—Hon. J. D. Armour ($6,000). *Justices of Appeal*—Hon. F. Osler, Hon. James Maclennan, Hon. Charles Moss, Hon. J. F. Lister ($5,000 each). *Registrar*—J. S. Cartwright. *Assistant Registrar*—Charles S. Grant. *Reporter*—R. S. Cassels. *Usher and Messenger*—E. Oliver.

High Court of Justice for Ontario.

The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also (with the inquest of twelve good and lawful men in the cases provided for) try all issues of fact, and give judgment, and award execution thereon, and also in matters which relate to the King's Revenue (including the condemnation of contraband or smuggled goods) as may be done by His Majesty's Superior Courts of Law in England, and also the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators,

co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law.

Divisional Court sittings are held on the first Monday of each month (except vacation) to dispose of such matters as may properly be brought before a Divisional Court.

LAW CIRCUITS.—*Sittings for Hearing of Actions.*—In the Counties of York, Wentworth, Carleton and Middlesex, there is held an additional such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held another such Court, between Easter Term and the first day of July. Whenever in any year the judges may determine that it is not necessary to hold the latter such sittings may be dispensed with. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery.

The Courts in each Circuit are presided over by the Chancellor or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of His Majesty's Counsel learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

WEEKLY SITTINGS.—A Judge sits at Osgoode Hall every week except vacation for the purpose of disposing of all business except trials which may be transacted by a single Judge. Chamber business on Mondays and Fridays. Court business on Tuesdays, Wednesdays and Thursdays. Sittings will be held at Ottawa and London respectively at least one day in each week (except vacation) to dispose of certain matters which can be determined by a single Judge. The Judges have now power on petition to constitute monthly or semi-monthly sittings in lieu of weekly.

CHAMBERS.—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of any Official Referee to sit with or for him.

LONG VACATION extends from the 1st of July to the 31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

HEIR AND DEVISEE COURT.—Commissioners, the Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Their duties are to determine claims to land in Ontario, for which no patent has issued from the Crown in favor of the proper claimants, whether as heirs, devisees, or assignees. Sittings at Toronto, first Monday in January and July in each year. *Judges*—The Judges of the Superior Court (*ex-officio*), others appointed by commission.

COURTS FOR THE TRIAL OF CONTROVERTED ELECTIONS.—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Supreme Court of Judicature meet annually on or before the third day of Michaelmas sittings and severally elect, by a majority of votes, a Judge from their respective Courts or Division to be placed on the rota for the trial of election petitions during the ensuing year. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

Their jurisdiction extends to actions of debt or contract where the balance claimed is over $100 and under $200 and the original amount was ascertained by the signature of the defendant, and to $100 in other cases of debt, subject in some cases to an appeal to the Court of Appeal; but the sum of the account to be gone into cannot exceed $400; injuries or torts to personal chattels amounting to $60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquor drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. THE LAW OF INTESTATES ESTATES.

DESCENT AND DISTRIBUTION OF PROPERTY.

As to all persons who died before the first day of January, 1852, the rules of descent are substantially the same as in England at that date.

Real estate of persons who died intestate (*i.e.*, who have left no will) after that date and prior to the first day of July, 1886, descends first to lineal descendants and those claiming by or under them *per stirpes*, second to father, third to mother, and fourth to collateral relatives, subject to certain rules and regulations prescribed in the statute.

The surplus personal estate of intestates who died prior to the first day of July, 1886, is, after the expiration of one full year from the death of the intestate, to be distributed in the following manner: One-third shall go to the widow of the intestate, and the residue in equal proportions to his children, or if dead, to their lineal descendants; if there are no children or legal representatives subsisting, then where the net value of the real and personal estate does not exceed $1,000, same belongs absolutely to the widow, and as to any excess over and above said amount after payments of debts, etc., the widow takes a moiety, and the other moiety goes to the next of kindred, in equal degree, and their representatives; if no widow, all to children; if neither widow nor children, all to next of kin, in equal degree, and their representatives. But no representation is admitted among collaterals further than children of intestate's brothers and sisters.

All real and personal property of persons dying on or after the 1st day of July, 1886, devolves upon and becomes vested in the legal personal representatives for the period of a year (which may be extended in a prescribed manner) subject to the payment of debts and to the effectual dispositions of deceased. The real and personal property of a married woman, in respect of which she has died intestate, shall be distributed as follows: One-third to her husband, if she leaves issue, and one-half if she leaves none, and subject thereto, shall go as if her husband had predeceased her. The realty and personalty comprised in a residuary devise or bequest is (unless the will otherwise directs) applicable ratably according to their respective value to the payment of the debts.

PAR OF EXCHANGE.

In 1707 it was enacted that certain French and Spanish coins should pass as dollars at four to the pound currency, and as four shillings and sixpence sterling, so eighteen shillings sterling became equal to a pound (or twenty shillings) currency, and twenty shillings sterling became equal to $4.44\frac{4}{9}$ currency, and $4.44 was known as "par." In 1871 the Federal Parliament made the British sovereign current at $4.86\frac{2}{3}$, being $9\frac{1}{2}$ per cent. premium on the old par.

Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Councils, except where there is only one school in the County. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives a fixed amount of $400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have an average attendance of 60 pupils, may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation in the Universities. There were 38 Collegiate Institutes and 93 High Schools, with 21,723 pupils, in Ontario in 1900.

Public Schools.

Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality.

Educational Museum.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture, a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. Here also is the largest collection of archæological material in the Dominion, chiefly illustrative of Ontario, and of North America. David Boyle, Archæologist. The Museum is freely open to the public from 9 a.m. to 5 p.m.

ONTARIO EDUCATIONAL SYSTEM.

Subject to the approval of the Provincial Government all regulations for the public and high schools are made by the Minister of Education. These schools are under the control of local boards of trustees, elected by the ratepayers, and are allowed to have none but certificated teachers. Education of children between the ages of seven and thirteen is compulsory for not less than one hundred days in the year. Some of the noteworthy features in Ontario's system of education are; uniform course of study for all schools; all public and high schools in the hands of professionally trained teachers; provincial instead of local control of examination of teachers; uniformity of text-books and common matriculation for admission to all universities and learned professions. These give unity to the system, which includes (*a*) Kindergarten, (*b*) Public or Separate Schools, (*c*) High Schools or Collegiate Institutes, (*d*) the University.

INSANE IN CANADA.

The number of insane in Canada in 1891 as obtained by the census was 13,355, of which 7,162 were males and 6,193 females.

In every 10,000 males there were 29.1 insane, and in every 10,000 females there were 26.1 insane.

The insane, classified according to civil condition, were: single, 9,506; married, 2,815; widowed, 721; unknown, 313.

Of the single, 5 441 were males and 4,065 females; of the married, 1,239 were males and 1,576 females; of the widowed, 218 were males and 503 females, and of the unknown, 206 were males and 107 females.

According to ages there were 762 insane under 15 years old; 701 between 15 and 19 years old; 2,429 between 20 and 29; 2,643 between 30 and 39 years; 5,369 between 40 and 69 years; 878, 70 years and over, and 576 whose ages were unknown.

Under 15 years the percentage was 0.04; between 15 and 19 years it was 0.13; between 20 and 29 it was 0.28; between 30 and 39 it was 0.45; and between 40 and 69 years it was 0.57 per cent., showing a larger proportion of the insane among the population between 40 and 69 than among other age groups.

According to nativity, 5,853 of the insane were born in Canada of parents who were both born in Canada; 2,793 were born in Canada of foreign born parents; 612 were born in Canada of parents one of whom was born in Canada, and 3,044 were foreign born; 1,053 were born in Canada, but the birth-place of their parents were unknown.

These constitute two groups: (1) Those whose parents were foreign born, and (2) all the others. The first group have 90 in every 10,000 of the foreign-born population; the second group have 18 insane in every 10,000 of the native born.

Synopsis of Fishery Laws.

Net fishing of any kind is prohibited in public waters, except under Leases or Licenses. The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays. A general weekly Close-time is provided in addition to special close seasons. The use of Explosive or Poisonous substances for catching or killing fish is illegal. The use of fire-arms for killing fish is prohibited. Mill-dams must be provided with efficient fish passes.

The above enactments and close seasons are supplemented in special cases, under authority of the *Dominion Fisheries Act* (Chap. 95 R. S.), by a total prohibition of fishing for stated periods. All communications relating to Fisheries should be addressed: Department of Marine and Fisheries, Ottawa.

THE ONTARIO SUCCESSION DUTY ACT.

The Succession Duty Act, Revised Statutes of Ontario, 1897, Chapter 24, applies to the estates of persons dying on or after 1st July, 1892, and applies to real and personal property of every description except:

(1) Where the value of the estate after payment of all debts and expenses of administration does not exceed $10,000.

(2) To property given for religious, charitable or educational purposes.

(3) Property passing to or for the use of father, mother, husband, wife, child, grandchild, daughter-in-law or son-in-law of the deceased where the aggregate value of the property of the deceased does not exceed $100,000.

The Act applies:

(a) To all property passing either by Will or intestacy within Ontario, whether the deceased was domiciled in Ontario at the time of his death or elsewhere.

(b) To all said property which shall be voluntarily transferred by deed, sale or gift made in contemplation of the death of the grantor or intended to take effect after such death to any person in trust or otherwise.

(c) To any property taken as a *donatio mortis causa* made by any person dying on or after 7th April, 1896, or taken under the disposition made by any person so dying purporting to operate as an immediate gift whether by way of transfer, delivery, declaration of trust or otherwise which shall not have been *bona fide* made twelve months before the death of the deceased.

(d) To any property, which the person dying on or after 7th April, 1896, having been absolutely entitled thereto has caused to be transferred or vested in himself and any other person jointly so that the beneficial interest therein, or in some part thereof, passes or accrues by survivorship on his death to such other person.

(e) To property passing under settlement, as to which see the Act.

(f) To the beneficial interest arising by survivorship or otherwise (if any) from Annuities.

Where the aggregate value of the property of deceased exceeds $100,000 and passes in whole or in part to or for the benefit of the father, mother, husband, wife, child, grandchild or other lineal descendant or daughter-in-law or son-in-law of the deceased, the same shall be subject to a duty of $2.50 for every $100 of the value.

Where the aggregate value of said property exceeds $200,000 the whole shall be subject to a duty of $5 for every $100.

Where the value of the property of the deceased exceeds $10,000, so much thereof as passes to or for the benefit of the grandfather or grandmother, or any other lineal ancestor of the deceased except the father and mother, or to any brother or sister of the deceased, or to any descendants of such brother or sister, or to a brother or sister of the father or mother of the deceased, or of any descendant of such last mentioned brother or sister, shall be subject to a duty of $5 for every $100.

Where the value of said property exceeds $10,000 and any part thereof passes to or for the benefit of any person in any other degree of collateral consanguinity to the deceased than is above described, or to or for the benefit of any stranger in blood to the deceased save as hereinbefore provided for, same shall be subject to a duty of $10 for every $100 of the value.

Provided that where the whole value of any said property does not exceed $200 the same shall be exempt from duty.

Any property brought into Ontario for administration or distribution shall be liable to the duty.

Executors or administrators are directed to make and file with the Surrogate Registrar a statement under oath showing (*a*) itemized inventory of all the property of the deceased and the market value thereof, and (*b*) the several persons to whom the same will pass under the Will or intestacy and their degree of relationship (if any); and the executor shall before the issue of Letters Probate or of Administration deliver to the Surrogate Registrar a bond with two sureties in a penal sum equal to ten per cent. of the sworn value of the property of the deceased liable to succession duty.

Should the Treasurer of the Province be not satisfied with the value so sworn to or with the correctness of the inventory, provision is made for a valuation and appraisement of the said property by the Sheriff of the County in which same is situate, with the right of appeal by either party from such appraisement to the Surrogate Judge of the County.

The Law Society of Ontario.

The Law Society was first established in 1797 by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated ; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under Revised Statutes of Ontario, c. 145, 1887, the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario ; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head-quarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts ; with a valuable and extensive library.

LIFE INSURANCE.

The Dominion Government requires all life insurance companies doing business in Canada to make up, under oath, and deposit with the Superintendent of Insurance within two months after the close of the year, in the form prescribed by law, a statement of their affairs. These statements are subsequently verified by the Superintendent of Insurance, by personal examination at the company's chief offices, and embodied in an annual report to Parliament. The business of life insurance may be said to be wholly transacted by companies authorized by the Dominion Government, there being but one or two institutions incorporated by provincial legislation.

In 1900 there were 37 companies operating in Canada, as follows:

Canadian companies	.....	18
British "	.....	9
American "	.....	10
		—37

The new business transacted in 1900 was $68,896,092, distributed as follows:—

Canadian Companies, $38,545,949, or 56% of the whole.
British " 3,717,997, " 5% " "
American " 26,632,146, " 39% " "

The amount taken by native companies exceeded that taken by the British and American together by $8,195,806.

The total amount of insurance in force December 31st, 1900, was $431,069,846 (or almost five times what it was at the close of 1880), allocated as follows:—

Canadian Companies, $267,151,086, or 62% of the whole.
British " 39,485,344, " 9% " "
American " 124,433,416, " 29% " "

Formerly the American companies held the foremost place, but for many years they have been obliged to give way to the energetic enterprise of the home companies, whose total business now exceeds that of the American companies twice over.

In 1900 the combined Life Companies received $15,006,941 in premiums, distributed thus:

Canadian Companies, $9,373,405, or 63% of the whole.
British " 1,372,355, " 9% " "
American " 4,261,181, " 28% " "

while the total amount paid to policy-holders was $9,232,061.

The figures in the following table are taken from the latest Government returns, being for the year ending December 31st, 1900:

*Amalgamated in 1901.

It is not pretended that these figures alone should be a guide in the selection of a company to insure in, inasmuch as they do not represent the *summum bonum* of any company, but are given simply to enable the reader to obtain an idea of the business transacted by some of the principal companies operating in Canada. In selecting a company to insure in, the main points to be observed are:

(1) Its financial strength, to be tested by a comparison of the assets with the liabilities;

(2) An examination of the profit-earning power of the company;

(3) Of its expense ratio;

(4) Of its premium rates;

(5) Of the conditions and privileges of its policy contract, etc.

The death-rate of the active companies for the last eight years, is as follows:—

Year.	Death-rate per 1000.	Year.	Death-rate per 1000.
1900	11.226	1896	10.095
1899	10.733	1895	11.166

PLANS OF INSURANCE.

Policies are divided into two main classes, ordinary life and endowment. The life policy is payable at death only, the endowment at the end of a specified period (usually 10, 15, 20 or 25 years), or at death, if that should occur sooner. The life policy is usually secured for protection for the family, while the endowment policy fulfils a double object, viz.: provision for the family in case of death within the endowment term, and a competency to the insured should he survive the period. The life policy may be secured with premiums payable each year that the life enters upon, or, which is more preferable and popular at the present time, by a limited number of payments; for example, a twenty-payment life, after running for twenty years, is paid up, but the insurance is not payable until death. Similarly, fifteen and ten-payment life policies are paid up after fifteen and ten annual payments respectively, but are not payable until death.

The endowment policy is generally secured by annual premiums payable for the same number of years as the endowment term, but this policy is sometimes written with premiums payable only through a portion of the term. For example, a twenty-year endowment by ten payments is a policy payable twenty years hence, or at prior death, with payment of premiums limited to the first ten years of the policy. The premium rates of most of the representative Canadian life insurance companies are uniform at all ages for the principal plans of insurance. The rates of the American companies are invariably higher than those of Canadian companies.

AMENDMENT TO INSURANCE ACT.

The amendment to the Insurance Act, which was made at the 1899 session of the Dominion Parliament, among other matters, provides for these important changes:—

(1) For the extension and uniformity of the powers of investing the funds of Canadian life insurance companies, and

(2) That the interest basis of Reserves shall be as follows: for all new business transacted after January 1st, 1900, 3½ per cent.; for business existing as at January 1st, 1900, 4½ per cent., until January 1st, 1910, after which date the rate is to be 4 per cent. until January 1st, 1915, and thereafter 3½ per cent. As a result of the more stringent 3½ per cent. valuation, the life insurance companies were obliged to increase their rates, to take effect January 1st, 1900.

SURRENDER VALUES AND DIVIDENDS.

Cash values, or paid-up values, are usually allowed upon surrender of life or endowment policies, after three or more annual premiums have been paid. It has now become very general to endorse upon the policy the amount of these values. On policies taken out on the with-profit system, dividends are apportioned either annually, quinquennially, or accumulated for a period of ten, fifteen or twenty years, known as the Tontine, Reserve Dividend or Accumulative Period. The dividends to those who survive this period are increased by the dividends of those who die within it.

11—A great demonstration against the British Government's Maltese policy is held in the island. The chief grievance for the past three years has been the policy of the Government in regard to the Italian language. The tongue of the people is Maltese (based on Arabic), but Italian is the language of the educated and wealthy. The Italian was compulsory in courts of law until 1899, when an order-in-council made English optional and designed to supersede the Italian in fifteen years. Another grievance is the complaint of military rule, as the island is not self-governing, though it has possessed since 1887 a complete civil administration, with elected members of the council vested with large powers, especially as to public expenditure—powers which have been used to bring about a deadlock. To foil "the systematic policy of petty obstruction" Mr. Chamberlain decided to carry out necessary measures by orders-in-council. This decision has brought the troubles to a head.

Gilbert Parker's Great Novel

The Right of Way

Sixteen full-page illustrations

Cloth. Gilt-top. Maple-Leaf Design - - $1.50
Cloth. Gilt-top. Library Edition - - - $1.50

Mr. Gilbert Parker has presented us with many pictures of the life of French-Canada, painting into them with masterly touch its old-world grace, its gaiety, its pathos, its simplicity, its devotion to sentiment, its heroisms, little and great; but he has given us nothing better than those contained in "The Right of Way." The book sweeps on to its inevitable end. The central figure is the figure dear to romance—and dear to us all in its appeal to the heart and the imagination.—*Literature.*

The Best Selling Book of the Year Throughout America

The Crisis

By WINSTON CHURCHILL

Eight rare Illustrations by Howard Chandler Christy, the rival of Gibson in art.

Paper, 75 cents. Cloth, $1.25

Cyrus Townsend Brady, in the *Book Buyer*, gives his valuable opinion of "The Crisis."

> "Mr. Churchill has scored a veritable triumph. It is in my judgment a marked and distinct advance on everything he has done. It is so good, indeed, that I call it, after due deliberation, a great novel. This is a word which is lightly applied, as a rule, and usually signifies nothing. In this case, however, I intend to convey the original meaning of the phrase, and I do not say it lightly. . . . I congratulate him on his work, which is at once the despair of other writers and their inspiration."

The Helmet of Navarre

Illustrated by André Castaigne, the most brilliant of living illustrators. . . . .

Paper, 75 cents. Cloth, $1.25

A story of Paris in 1593, full of dash and spirit natural to the violent times, to the clash of faiths, and narrating fierce rivalry for the hand of a court beauty known as the Rose of Lorraine.

◆◆◆◆

The romance of the day. It is equal to anything Dumas has ever written.—*Canadian Bookseller.*

A very whirlwind of exciting adventure—*Ladies Magazine.*

The love story of "The Helmet of Navarre" is like a silken thread which runs through blood stones of adventure—duels, hand-to-hand contests and deadly encounters. It is like going back into one's early "teens" to read the book—the days when all one cared for was to be entertained, not instructed or educated. There is no "problem" in "The Helmet of Navarre." There is no purpose, save to keep the reader so entertained he forgets his dinner and his hour for retiring. It is an excellent kind of literature for the philosopher, the thinker, and the brain toiler, since it requires no mental exercise. It is like witnessing a succession of dangerous athletic sports, which rivet the attention, and distract the mind from graver subjects. So, if you want at once to be entertained and to be made optimistic regarding the growth of humanity, read "The Helmet of Navarre."—*Quebec Chronicle.*

THE BRITISH WEEKLY says:

As a work of real genius "Young Barbarians" deserves to rank with "Treasure Island." We can imagine Statesmen and Judges, and all sorts of staid and sober men becoming boys once more, and sitting up long after bed-time to read of the exploits of Speug and Nestie.

◆ ◆ ◆ ◆

WILLIAM WALLACE says:

It remains to be said, and said with the cordiality of a Scottish handshake, that Ian Maclaren has produced one of the pleasantest, healthiest, and best books of the year.

◆ ◆ ◆ ◆

THE CHICAGO RECORD-HERALD says:

"Young Barbarians" is one of the finest literary products of the year. The charm of Ian Maclaren's writing is as intangible as the perfume of the rose. There is a union of robustness and tenderness, of laughter and tears, of human nature and literary art, that one finds nowhere else. It is a wholesome, kindly, red-blooded, human book, which any one will be the merrier and the sweeter spirited for reading.

BY S. WEIR MITCHELL

Paper, 75 cents. - - - - Cloth, $1.25

The story is a study in the lives of wealthy Americans, the chief incident being one remarkable enough to arouse and retain interest, yet not so unusual as to cause the reader to feel that there is the slightest tinge of improbability in the story. The principal character is an adventuress who makes it her business to gain control of the wealthy head of a typical family. Step by step the designing woman gains the confidence of her victim, makes herself indispensable to him, and at length rules him. . . . . Few books of late have shown such grasp of life.—*The Commonwealth.*

The final and greatest charm of all has been found in the genial tone and polished style of the telling. . . . It is more truly the novel of the year than 999 of the other claimants for that distinction.—*Times Saturday Review.*

By F. MARION CRAWFORD

This story is written in the matchless Crawford style, and the romantic episode is historically true. The scenes are laid about the end of the Fifteenth century, when the Queen of the Adriatic was approaching her greatest splendor.

The action and interest centre in the household of a master glass-blower, and there is much curious information as to that artistic craft.

Mr. Crawford has always been singularly fortunate in his descriptions of artists and their surroundings, and the careful study which he has made of the domestic life of the middle ages in Italy, enables him to give an accurate background to his characters, set off with picturesque details.

New Canterbury Tales

By MAURICE HEWLETT

Paper, 75 cents. Cloth, $1.25

A theme exactly suited to the mind and pen of Maurice Hewlett—that great master of the brush of English. He has taken the famous Canterbury Pilgrimage as the scene of these tales; and, with a blending of comedy and deep emotion, has reproduced that period with marvellous reality and charm.

God Wills It

By WILLIAM STEARNS DAVIS

ILLUSTRATED

Paper, 75 cents - - Cloth, $1.25

◆ ◆ ◆ ◆

A Tale of the First Crusade, with an element of Oriental gold and glitter, a flavor of "The Arabian Nights," an air of western feudalism, chivalry, romantic devotion to duty, a certain tinge of barbarism, yet a spirit of heroism and deeply religious faith pervading all.

The Benefactress

By the Author of "Elizabeth and Her German Garden."

Paper, 75 cents - - Cloth, $1.25

◆ ◆ ◆ ◆

The story of a young Englishwoman who, after years of living in another's home, finds herself independent through a legacy, and determines to use her new income in benefiting others without patronage. That the property left her is in a German village affords additional room for misconceptions, and her experiences are related with both the characteristic humor and underlying shrewd common sense of this charming author.
